

LNA-ESD Co-Design for Fully Integrated CMOS Wireless Receivers [

Leroux, Paul

Springer US,
2005

Monografía

LNA-ESD Co-Design for Fully Integrated CMOS Wireless Receivers fits in the quest for complete CMOS integration of wireless receiver front-ends. With a combined discussion of both RF and ESD performance, it tackles one of the final obstacles on the road to CMOS integration. The book is conceived as a design guide for those actively involved in the design of CMOS wireless receivers. The book starts with a comprehensive introduction to the performance requirements of low-noise amplifiers in wireless receivers. Several popular topologies are explained and compared with respect to future technology and frequency scaling. The ESD requirements are introduced and related to the state-of-the-art protection devices and circuits. LNA-ESD Co-Design for Fully Integrated CMOS Wireless Receivers provides an extensive theoretical treatment of the performance of CMOS low-noise amplifiers in the presence of ESD-protection circuitry. The influence of the ESD-protection parasitics on noise figure, gain, linearity, and matching are investigated. Several RF-ESD co-design solutions are discussed allowing both high RF-performance and good ESD-immunity for frequencies up to and beyond 5 GHz. Special attention is also paid to the layout of both active and passive components. LNA-ESD Co-Design for Fully Integrated CMOS Wireless Receivers offers the reader intuitive insight in the LNA\2019s behavior, as well as the necessary mathematical background to optimize its performance. All material is experimentally verified with several CMOS implementations, among which a fully integrated GPS receiver front-end. The book is essential reading for RF design engineers and researchers in the field and is also suitable as a text book for an advanced course on the subject

Título: LNA-ESD Co-Design for Fully Integrated CMOS Wireless Receivers [Recurso electrónico-En línea] by Paul Leroux, Michiel Steyaert

Editorial: Boston, MA Springer US 2005

Descripción física: XV, 187 p. digital

Tipo Audiovisual: Engineering Engineering design Computer engineering Electronics Engineering Electrical Engineering Engineering Design Electronics and Microelectronics, Instrumentation

Mención de serie: The Kluwer International Series in Engineering and Computer Science, Analog Circuits and Signal Processing 0893-3405 843

Documento fuente: Springer eBooks

Nota general: Engineering (Springer-11647)

Contenido: Abstract -- List of Symbols and Abbreviations -- 1. Introduction -- 2. Low-Noise Amplifiers in CMOS Wireless Receivers -- 3. ESD Protection in CMOS -- 4. Detailed Study of the Common-Source LNA with Inductive Degeneration -- 5. RF-ESD Co-Design for CMOS LNAs -- 6. Integrated CMOS Low-Noise Amplifiers -- 7. Conclusions -- A. Fundamentals of Two-Port Noise Theory -- Index

Restricciones de acceso: Accesible sólo para usuarios de la UPV

Tipo recurso electrónico: Recurso a texto completo

Detalles del sistema: Forma de acceso: Web

ISBN: 9781402031915

Autores: Steyaert, Michiel

Entidades: SpringerLink (Servicio en línea)

Enlace a formato físico adicional: Printed edition 9781402031908

Punto acceso adicional serie-Título: The Kluwer International Series in Engineering and Computer Science, Analog Circuits and Signal Processing 0893-3405 843
