

# Phoneme-Based Speech Segmentation using Hybrid Soft Computing Framework [

Sarma, Mousmita

Springer India :  
Imprint: Springer,  
2014

Monografía

The book discusses intelligent system design using soft computing and similar systems and their interdisciplinary applications. It also focuses on the recent trends to use soft computing as a versatile tool for designing a host of decision support systems

---

**Título:** Phoneme-Based Speech Segmentation using Hybrid Soft Computing Framework [Recurso electrónico] by Mousmita Sarma, Kandarpa Kumar Sarma

**Editorial:** New Delhi Springer India Imprint: Springer 2014

**Descripción física:** XXI, 187 p. 62 illus. online resource

**Mención de serie:** Studies in Computational Intelligence 550

**Nota general:** Título tomado de la pantalla de presentación (visitado el 16-02-15)

**Contenido:** Part 1 (Background): Introduction -- Speech Processing Technology-Basic Consideration -- Fundamental Considerations of ANN -- Sounds of Assamese Language -- State of Research of Speech Recognition -- Part 2 (Design Aspects): Phoneme Segmentation Technique using Self Organizing Map (SOM) -- Application of Proposed Phoneme Segmentation Technique in Spoken Word Recognition -- Application of Clustering Techniques to Generate A Priori Knowledge for Spoken Word Recognition -- Application of Proposed Phoneme Segmentation Technique in Speaker Identification -- Conclusion

**ISBN:** 978-81-322-1862-3 978-81-322-1861-6

**Materia:** Ingeniería Informática

**Autores:** Sarma, Kandarpa Kumar., author

**Entidades:** SpringerLink Book Series (Online Service)

**Punto acceso adicional serie-Título:** Studies in Computational Intelligence(Springer) 550
