

Structural Analysis

Bauchau, O. A.

Springer Netherlands : Imprint: Springer, 2009

Monografía

The authors and their colleagues developed this text over many years, teaching undergraduate and graduate courses in structural analysis courses at the Daniel Guggenheim School of Aerospace Engineering of the Georgia Institute of Technology. The emphasis is on clarity and unity in the presentation of basic structural analysis concepts and methods. The equations of linear elasticity and basic constitutive behaviour of isotropic and composite materials are reviewed. The text focuses on the analysis of practical structural components including bars, beams, and plates. Particular attention is devoted to the analysis of thin-walled beams under bending, shearing, and torsion. Advanced topics such as warping, non-uniform torsion, shear deformations, thermal effect and plastic deformations are addressed. A unified treatment of work and energy principles is provided that naturally leads to an examination of approximate analysis methods including an introduction to matrix and finite element methods. This teaching tool based on practical situations and thorough methodology should prove valuable to both lecturers and students of structural analysis in engineering worldwide

Título: Structural Analysis Recurso electrónico-En línea] edited by O. A. Bauchau, J. I. Craig

Editorial: Dordrecht Springer Netherlands Imprint: Springer 2009

Descripción física: XXII, 943p. digital

Tipo Audiovisual: Engineering Mechanics, applied Materials Mechanical engineering Astronautics Engineering Aerospace Technology and Astronautics Structural Mechanics Theoretical and Applied Mechanics Continuum Mechanics and Mechanics of Materials

Mención de serie: Solid Mechanics and Its Applications 0925-0042 163

Documento fuente: Springer eBooks

Nota general: Engineering (Springer-11647)

Restricciones de acceso: Accesible sólo para usuarios de la UPV

Tipo recurso electrónico: Recurso a texto completo

Detalles del sistema: Forma de acceso: Web

ISBN: 9789048125166

Autores: Craig, J. I.

Entidades: SpringerLink (Servicio en línea)

Enlace a formato físico adicional: Printed edition 9789048125159

Punto acceso adicional serie-Título: Solid Mechanics and Its Applications 0925-0042 163
