Monografía

This book introduces resource-aware data fusion algorithms to gather and combine data from multiple sources (e.g., sensors) in order to achieve inferences. These techniques can be used in centralized and distributed systems to overcome sensor failure, technological limitation, and spatial and temporal coverage problems. The algorithms described in this book are evaluated with simulation and experimental results to show they will maintain data integrity and make data useful and informative. Describes techniques to overcome real problems posed by wireless sensor networks deployed in circumstances that might interfere with measurements provided, such as strong variations of pressure, temperature, radiation, and electromagnetic noise; Uses simulation and experimental results to evaluate algorithms presented and includes real test-bed; Includes case study implementing data fusion algorithms on a remote monitoring framework for sand production in oil pipelines

Título: Resource-Aware Data Fusion Algorithms for Wireless Sensor Networks [Recurso electrónico] by Ahmed Abdelgawad, Magdy Bayoumi

Editorial: Boston, MA Springer US 2012

Descripción física: XV, 140p. 48 illus. digital

Mención de serie: Lecture Notes in Electrical Engineering 1876-1100 118

Documento fuente: Springer eBooks

Contenido: Introduction to wireless sensor networks -- Data fusion in wireless sensor networks -- Centralized data fusion algorithms -- Introduction to Kalman filters -- Proposed distributed Kalman filter -- Simulation and experimental results

Restricciones de acceso: Acceso restringido a miembros del Consorcio de Bibliotecas Universitarias de Andalucía

Detalles del sistema: Modo de acceso: World Wide Web

Fuente de adquisición directa: Springer

ISBN: 9781461413509 978-1-4614-1350-9 9781461413493 ed. impresa)

Autores: Bayoumi, Magdy

Entidades: SpringerLink (Online service)
