

# Turbulence and Interactions [ Proceedings the TI 2009 Conference /

Deville, Michel

Springer Berlin Heidelberg,  
2010

Monografía

This volume contains six keynote lectures and 44 contributed papers of the TI 2009 conference that was held in Saint-Luce, La Martinique, May 31-June 5, 2009. These lectures address the latest developments in direct numerical simulations, large eddy simulations, compressible turbulence, coherent structures, droplets, two-phase flows, etc. The present monograph is a snapshot of the state-of-the-art in the field of turbulence with a broad view on theory, experiments and numerical simulations

**Título:** Turbulence and Interactions Recurso electrónico-En línea] :] Proceedings the TI 2009 Conference edited by Michel Deville, Thien-Hiep Lê, Pierre Sagaut

**Editorial:** Berlin, Heidelberg Springer Berlin Heidelberg 2010

**Descripción física:** 375p. 257 illus. digital

**Tipo Audiovisual:** Engineering Physics Hydraulic engineering Engineering Engineering Fluid Dynamics Complexity Fluid- and Aerodynamics Statistical Physics, Dynamical Systems and Complexity

**Mención de serie:** Notes on Numerical Fluid Mechanics and Multidisciplinary Design 1612-2909 110

**Documento fuente:** Springer eBooks

**Nota general:** Engineering (Springer-11647)

**Contenido:** From the Contents: Some characteristics of non-reacting and reacting low swirl number jets -- Inner-outer interactions in wall-bounded turbulence -- Turbulence Interaction with Atmospheric Physical Processes -- LES of pulsating turbulent flows over smooth and wavy boundaries -- Numerical study of turbulence-wave interaction -- High Reynolds number wall-bounded turbulence and a proposal for a new eddy-based model -- PANS methodology applied to elliptic-relaxation based eddy viscosity transport model -- PIV Study of Turbulent Flow in Porous Media -- A model for dissipation: cascade SDE with Markov regime-switching and Dirichlet prior -- Wavelet analysis of the turbulent LES data of the lid-driven cavity flow -- A two-phase LES compressible model for plasma-liquid jet interaction -- Simulation of a fluidized bed using a hybrid Eulerian-Lagrangian method for particle tracking -- Wavelet-adapted sub-grid scale models for LES -- Effect of Particle-particle Collisions on the Spatial Distribution of Inertial Particles Suspended in Homogeneous Isotropic Turbulent Flows

**Restricciones de acceso:** Accesible sólo para usuarios de la UPV

**Tipo recurso electrónico:** Recurso a texto completo

**Detalles del sistema:** Forma de acceso: Web

**ISBN:** 9783642141393

**Autores:** Lê, Thien-Hiep Sagaut, Pierre

**Entidades:** SpringerLink (Servicio en línea)

**Enlace a formato físico adicional:** Printed edition 9783642141386

**Punto acceso adicional serie-Título:** Notes on Numerical Fluid Mechanics and Multidisciplinary Design 1612-2909 110
