2008

Monografía

The aim of this volume is to bring together research directions in theoretical signal and imaging processing developed rather independently in electrical engineering, theoretical physics, mathematics and the computer sciences. In particular, mathematically justified algorithms and methods, the mathematical analysis of these algorithms, and methods as well as the investigation of connections between methods from time series analysis and image processing are reviewed. An interdisciplinary comparison of these methods, drawing upon common sets of test problems from medicine and geophysical/environmental sciences, is also addressed. This volume coherently summarizes work carried out in the field of theoretical signal and image processing. It focuses on non-linear and non-parametric models for time series as well as on adaptive methods in image processing

**Título:** Mathematical Methods in Signal Processing and Digital Image Analysis Recurso electrónico-En línea] edited by Rainer Dahlhaus, Jürgen Kurths, Peter Maass, Jens Timmer

**Editorial:** Berlin, Heidelberg Springer Berlin Heidelberg 2008

**Descripción física:** XIV, 294 p. 109 illus., 13 illus. in color. online resource

**Tipo Audiovisual:** Computer science Computer graphics Information theory Statistical physics Dynamical systems Computer Science Computer Imaging, Vision, Pattern Recognition and Graphics Information and Communication, Circuits Statistical Physics, Dynamical Systems and Complexity Signal, Image and Speech Processing

**Mención de serie:** Understanding Complex Systems 1860-0832

**Documento fuente:** Springer eBooks

**Nota general:** Physics and Astronomy (Springer-11651)

**Contenido:** Multivariate Time Series Analysis -- Surrogate Data \2014 A Qualitative and Quantitative Analysis -- Multiscale Approximation -- Inverse Problems and Parameter Identification in Image Processing -- Analysis of Bivariate Coupling by Means of Recurrence -- Structural Adaptive Smoothing Procedures -- Nonlinear Analysis of Multi-Dimensional Signals: Local Adaptive Estimation of Complex Motion and Orientation Patterns

**Restricciones de acceso:** Accesible sólo para usuarios de la UPV

**Tipo recurso electrónico:** Recurso a texto completo

**Detalles del sistema:** Forma de acceso: Web

**ISBN:** 9783540756323 978-3-540-75632-3

**Autores:** Dahlhaus, Rainer., editor Kurths, Jürgen., editor Maass, Peter., editor Timmer, Jens., editor

**Entidades:** SpringerLink (Online service)

**Enlace a formato físico adicional:** Printed edition 9783540756316

**Punto acceso adicional serie-Título:** Understanding Complex Systems 1860-0832
