Título: Mathematical Models in Population Biology and Epidemiology [Recurso electrónico] by Fred Brauer, Carlos Castillo-Chávez

Editorial: New York, NY Springer New York Imprint: Springer 2001

Descripción física: XXIII, 417 p. online resource

Tipo Audiovisual: Chemical engineering Industrial Chemistry/Chemical Engineering Mathematical and Computational Biology Mathematics

Mención de serie: Texts in Applied Mathematics 0939-2475 40

Contenido: Part I: Simple Single-Species Models. 1. Continuous population models. 2. Discrete population models. 3. Continuous single-species population models with delay -- Part II: Models for Interacting Species. 4. Introduction and mathematical preliminaries. 5. Continuous models for two interacting populations. 6. Harvesting in two-species population models. 7. Multi-species population models -- Part III: Structured Population Models. 8. Models for population with age structure. 9. Models for populations with spatial distribution

ISBN: 9781475735161 978-1-4757-3516-1
