2014

Monografía

This book deals with theoretical aspects of modelling the mechanical behaviour of manufacturing, processing, transportation or other systems in which the processed or supporting material is travelling through the system. Examples of such applications include paper making, transmission cables, band saws, printing presses, manufacturing of plastic films and sheets, and extrusion of aluminium foil, textiles and other materials. The work focuses on out-of-plane dynamics and stability analysis for isotropic and orthotropic travelling elastic and viscoelastic materials, with and without fluid-structure interaction, using analytical and semi-analytical approaches. Also topics such as fracturing and fatigue are discussed in the context of moving materials. The last part of the book deals with optimization problems involving physical constraints arising from the stability and fatigue analyses, including uncertainties in the parameters. The book is intended for researchers and specialists in the field, providing a view of the mechanics of axially moving materials. It can also be used as a textbook for advanced courses on this specific topic. Considering topics related to manufacturing and processing, the book can also be applied in industrial mathematics.

Título: Mechanics of Moving Materials Recurso electrónico-En línea] by Nikolay Banichuk, Juha Jeronen, Pekka Neittaanmäki, Tytti Saksa, Tero Tuovinen

Editorial: Cham Springer International Publishing Imprint: Springer 2014

Descripción física: XVII, 253 p. 94 illus., 35 illus. in color. online resource

Tipo Audiovisual: Engineering Computer mathematics Physics Continuum physics Mechanics Continuum mechanics Engineering Continuum Mechanics and Mechanics of Materials Mechanics Computational Science and Engineering Numerical and Computational Physics Classical Continuum Physics

Mención de serie: Solid Mechanics and Its Applications 0925-0042 207

Documento fuente: Springer eBooks

Nota general: Engineering (Springer-11647)

Contenido: 1 Introduction -- 2 Travelling strings, beams, panels, membranes and plates -- 3 Stability analysis -- 4 Non-homogeneous tension profile -- 5 Travelling panels made of viscoelastic material -- 6 Travelling panels

interacting with external flow -- 7 Fracture and fatigue of travelling plates -- 8 Some optimization problems -- References -- Index

Restricciones de acceso: Accesible sólo para usuarios de la UPV

Tipo recurso electrónico: Recurso a texto completo
