Monografía

This book constitutes the refereed proceedings of the International Symposium on Logical Foundations of Computer Science, LFCS 2007, held in New York, NY, USA in June 2007. The volume presents 36 revised refereed papers carefully selected by the program committee. All current aspects of logic in computer science are addressed, including constructive mathematics and type theory, logical foundations of programming, logical aspects of computational complexity, logic programming and constraints, automated deduction and interactive theorem proving, logical methods in protocol and program verification and in program specification and extraction, domain theory logics, logical foundations of database theory, equational logic and term rewriting, lambda and combinatory calculi, categorical logic and topological semantics, linear logic, epistemic and temporal logics, intelligent and multiple agent system logics, logics of proof and justification, nonmonotonic reasoning, logic in game theory and social software, logic of hybrid systems, distributed system logics, system design logics, as well as other logics in computer science

Título: Logical Foundations of Computer Science [Recurso electrónico] :] International Symposium, LFCS 2007, New York, NY, USA, June 4-7, 2007. Proceedings edited by Sergei N. Artemov, Anil Nerode

Editorial: Berlin, Heidelberg Springer Berlin Heidelberg 2007

Descripción física: XI, 513 p. Also available online. digital

Mención de serie: Lecture Notes in Computer Science 0302-9743 4514

Documento fuente: Springer eBooks

Restricciones de acceso: Acceso restringido a miembros del Consorcio de Bibliotecas Universitarias de Andalucía

Detalles del sistema: Modo de acceso: World Wide Web

Fuente de adquisición directa: Springer (CS)

ISBN: 9783540727347 978-3-540-72734-7 9783540727323 ed. impresa)

Autores: Nerode, Anil

Entidades: SpringerLink (Online service)
