Monografía

This book covers the latest developments in imaging of atherosclerosis. Topics covered include multi-detector-row technology and the use of dual energy and multi-spectral imaging. Magnetic Resonance (MR) imaging of carotid arteries, intra-cranial vessels, and coronary arteries are also discussed in detail. Special attention is given to Computer Tomography (CT) imaging of intra-cranial vessels, coronary arteries, and atherosclerosis in the lower limb. This is an ideal book for graduate students and researchers in the field of medical imaging, especially of atherosclerosis. This book also: Covers state-of-the-art imaging of atherosclerosis Enables the reader to understand the advantages of each modality in visualizing atherosclerosis Describes the advances of various technologies, including dual energy and multi-spectral imaging

Título: 3D Imaging Technologies in Atherosclerosis [Recurso electrónico] edited by Rikin Trivedi, Luca Saba, Jasjit S Suri

Edición: 1st ed. 2015

Editorial: New York [etc.] Springer

Descripción física: VII, 239 p. 190 il., 87 il. en color

Detalles del sistema: Modo de acceso: Word Wide Web Modo de acceso: World Wide Web

Fuente de adquisición directa: Springer (e-Books)

ISBN: 9781489976185 978-1-4899-7618-5 9781489976178

Autores: Trivedi, Rikin Saba, Luca Suri, Jasjit S
