Monografía

This volume describes our current understanding of the biological role of visual and non-visual arrestins in different cells and tissues, focusing on the mechanisms of arrestin-mediated regulation of GPCRs and non-receptor signaling proteins in health and disease. The book covers wide range of arrestin functions, emphasizing therapeutic potential of targeting arrestin interactions with individual partners

Título: Arrestins - Pharmacology and Therapeutic Potential Recurso electrónico] edited by Vsevolod V Gurevich

Editorial: New York [etc.] Springer

Descripción física: VIII, 447 p. 53 il., 42 il. en color

Mención de serie: Handbook of Experimental Pharmacology 0171-2004 219

Contenido: Therapeutic Potential of Small Molecules and Engineered Proteins.-Arrestin Interactions with G Protein-coupled Receptors -- Arrestin-biased GPCRAgonists -- Arrestin-1 Expression Levels, Rod Function and Health -- Protective Functions of Arrestin-1 in Photoreceptors -- Arrestin-4 and Cone Function -- Enhanced Phosphorylation-independent Arrestins and Gene Therapy -- Targeting Particular Receptors with Redesigned Non-visual Arrestins.-Arrestins binding to clathrin, AP2 and Role in GPCR trafficking -- Arrestins in Ubiquitination and Deubiquitination -- Arrestin Self-association -- Arrestin-dependent Activation of ERK and Src -- Arrestin-dependent Activation of JNK Family Kinases -- Arrestin-Mediated P38 Activation.-Arrestin-dependent PDE Localization -- Arrestins in Cell Migration -- Arrestins in Host-pathogen Interactions -- Arrestin Regulation of Small GTPases -- GPCRs and Arrestins in Airways: Implications for Asthma -- Arrestins as Regulatory Signaling Hubs in Cancer Pathways -- Arrestins in Pain and Anesthesia

Detalles del sistema: Modo de acceso: Word Wide Web Modo de acceso: World Wide Web

Fuente de adquisición directa: Springer (e-Books)

ISBN: 9783642411991 9783642411984

Autores: Gurevich, Vsevolod V

Punto acceso adicional serie-Título: Handbook of Experimental Pharmacology 0171-2004 219
