Monografía

There is currently considerable interest in the development of medicines that would enhance endocannabinoid-induced g2sautoprotectiong3s, for example through inhibition of endocannabinoid metabolizing enzymes or cellular uptake processes or that would oppose endocannabinoid-induced g2sautoimpairmentg3s. This volume describes the physiology, pathophysiology and pharmacology of the endocannabinoid system and potential strategies for targeting this system in the clinic

Título: Endocannabinoids [Recurso electrónico] edited by Roger G Pertwee

Edición: 1st ed. 2015

Editorial: New York [etc.] Springer

Descripción física: XII, 475 p. 21 il., 15 il. en color

Mención de serie: Handbook of Experimental Pharmacology 0171-2004 231

Detalles del sistema: Modo de acceso: Word Wide Web Modo de acceso: World Wide Web

Fuente de adquisición directa: Springer (e-Books)

ISBN: 9783319208251 978-3-319-20825-1 9783319208244

Autores: Pertwee, Roger G

Punto acceso adicional serie-Título: Handbook of Experimental Pharmacology 0171-2004 231
