The International Symposium on Experimental Robotics (ISER) is a series of bi-annual meetings which are organized in a rotating fashion around North America, Europe and Asia/Oceania. The goal of ISER is to provide a forum for research in robotics that focuses on novelty of theoretical contributions validated by experimental results. The meetings are conceived to bring together, in a small group setting, researchers from around the world who are in the forefront of experimental robotics research. This unique reference presents the latest advances across the various fields of robotics, with ideas that are not only conceived conceptually but also explored experimentally. It collects robotics contributions on the current developments and new directions in the field of experimental robotics, which are based on the papers presented at the 14th ISER held on June 15-18, 2014 in Marrakech and Essaouira, Morocco. This present fourteenth edition of Experimental Robotics edited by M. Ani Hsieh, Oussama Khatib, and Vijay Kumar offers a collection of a broad range of topics in field and human-centered robotics.

Título: Experimental Robotics The 14th International Symposium on Experimental Robotics edited by M. Ani Hsieh, Oussama Khatib, Vijay Kumar

Edición: 1st ed. 2016

Editorial: Cham Springer International Publishing Imprint: Springer 2016

Descripción física: 1 recurso en línea XIV, 927 p. 497 illus., 65 illus. in color

Mención de serie: Springer Tracts in Advanced Robotics 1610-7438 109 Springer eBooks

Contenido: Locomotion -- Haptics -- Manipulation -- Perception -- Human-Robot Interaction -- Mapping and Localization -- Mechanisms -- Perception and Planning -- Sensor Networks -- Many-Robot Systems -- Interactive Presentations -- Plenary Talk

Detalles del sistema: Modo de acceso: World Wide Web

ISBN: 9783319237787 978-3-319-23778-7

Materia: Engineering Artificial intelligence Robotics Automation Engineering Robotics and Automation Artificial Intelligence (incl. Robotics)

Autores: Hsieh, M. Ani., editor Khatib, Oussama., editor Kumar, Vijay., editor

Entidades: SpringerLink (Online service)

Punto acceso adicional serie-Título: Springer Tracts in Advanced Robotics 1610-7438 109
