

Galina Balashova : architect of the Soviet Space Programme /

Meuser, Philipp (1969-)

DOM,
cop. 2015

Monografía

This monograph on the work of the Russian architect Galina Balashova presents a unique collection of designs for Soviet cosmonautics. These include plans and engineering drawings for Soyuz capsules and the space stations Salyut and Mir. Balashova acted as a consultant to the Buran programme, the Soviet counterpart to the American Space Shuttle. book architectural Striving for harmony and beauty, the architect strikes an emotional chord in the high-tech world of carrier rockets, laboratories and survival equipment. It is therefore due to Balashova's talent that a unique chapter has been added to Soviet architectural history: Architecture for Cosmonautics. libro arquitectura Her exceptional achievements, including designs for medals and emblems, are still scarcely known today - even in Russia
