Monografía

This book examines in detail the entire process involved in implementing geotechnical projects, from a well-defined initial stress and deformation state, to the completion of the installation process. The individual chapters provide the fundamental knowledge needed to effectively improve soil-structure interaction models. Further, they present the results of theoretical fundamental research on suitable constitutive models, contact formulations, and efficient numerical implementations and algorithms. Applications of fundamental research on boundary value problems are also considered in order to improve the implementation of the theoretical models developed. Subsequent chapters highlight parametric studies of the respective geotechnical installation process, as well as elementary and large-scale model tests under well-defined conditions, in order to identify the most essential parameters for optimizing the process. The book provides suitable methods for simulating boundary value problems in connection with geotechnical installation processes, offering reliable predictions for the deformation behavior of structures in static contexts or dynamic interaction with the soil

Título: Holistic Simulation of Geotechnical Installation Processes Benchmarks and Simulations edited by Theodoros Triantafyllidis

Edición: 1st ed. 2016

Editorial: Cham Springer International Publishing Imprint: Springer 2016

Descripción física: 1 recurso en línea VIII, 253 p. 138 illus., 92 illus. in color

Mención de serie: Lecture Notes in Applied and Computational Mechanics 1613-7736 80 Springer eBooks

Detalles del sistema: Modo de acceso: World Wide Web

ISBN: 9783319231594

Materia: Engineering Geotechnical engineering Continuum mechanics Engineering geology Engineering- Geology Foundations Hydraulics Engineering Geoengineering, Foundations, Hydraulics Geotechnical Engineering & Applied Earth Sciences Continuum Mechanics and Mechanics of Materials

Autores: Triantafyllidis, Theodoros., editor

Entidades: SpringerLink (Online service)

Punto acceso adicional serie-Título: Lecture Notes in Applied and Computational Mechanics 1613-7736 80
