This book presents the proceedings of the 14th International Probabilistic Workshop that was held in Ghent, Belgium in December 2016. Probabilistic methods are currently of crucial importance for research and developments in the field of engineering, which face challenges presented by new materials and technologies and rapidly changing societal needs and values. Contemporary needs related to, for example, performance-based design, service-life design, life-cycle analysis, product optimization, assessment of existing structures and structural robustness give rise to new developments as well as accurate and practically applicable probabilistic and statistical engineering methods to support these developments. These proceedings are a valuable resource for anyone interested in contemporary developments in the field of probabilistic engineering applications

Título: 14th International Probabilistic Workshop edited by Robby Caspee, Luc Taerwe, Dirk Proske

Editorial: Cham Springer International Publishing Imprint: Springer 2017

Descripción física: 1 recurso en línea XII, 540 p. 325 il., 253 il. en color

Mención de serie: Springer eBooks

Contenido: Part I Biomechanical Engineering -- Part II History of Mechanism and Machine Science -- Part III Linkages and Mechanical Controls -- Part IV Multi-Body Dynamics -- Part V Reliability -- Part VI Robotics and Mechatronics -- Part VII Transportation Machinery -- Part VIII Tribology -- Part IX Vibrations

Detalles del sistema: Modo de acceso: World Wide Web

ISBN: 9783319478869

Materia: Engineering Statistics Quality control Reliability Industrial safety Civil engineering Engineering Civil Engineering Quality Control, Reliability, Safety and Risk Statistics for Engineering, Physics, Computer Science, Chemistry and Earth Sciences Ingeniería

Autores: Caspee, Robby Taerwe, Luc Proske, Dirk

Entidades: SpringerLink (Online service)
