Monografía

"This book has three main goals. The first is to celebrate the work of a great public health figure, the late A.J. (Tony) McMichael (1942-2014). The second is to position contemporary public health issues in an interdisciplinary context and in ways that highlight the interdependency between the environment, human institutions and behaviours; a broad approach championed by Tony. The third is to encourage emerging and future public health leaders to advocate for policies and cultural change to sustain and improve human health, from a foundation of objective scholarship."--Website

Título: Health of people, places and planet reflections based on Tony McMichael's four decades of contribution to epidemiological understanding edited by Colin D. Butler, Jane Dixon and Anthony G. Capon

Editorial: Acton ACT, Australia Australian National University Press [2015] 2015

Descripción física: 1 online resource (xlvii, 641 pages) : illustrations (some color)

Nota general: "Traditionally, festschrifts are books. 'Fest' conveys celebration, 'schrift' denotes text. In this case, we assert both the conference and this book were part of Tony's festschrift with an Australian flavour" - footnote, xxi

Bibliografía: Includes bibliographical references

Contenido: Part 1: Introduction -- Reprint A: Preface to 'planetary overload: global environmental change and the health of the human species' -- From silent spring to the threat of a four-degree world / Colin D. Butler and Alistair Woodward -- A long collaboration / Basil S. Hetzel -- Much said, much to be done / John Reid, Anthony G. Capon and Jane Dixon -- Reprint B: Prisoners of the proximate: loosening the constraints on epidemiology in an age of change / Anthony J. McMichael -- Part 2: Healthy workers -- Reprint C: Standardized mortality ratios and the 'healthy worker effect': scratching beneath the surface / Anthony J. McMichael -- Occupational stress / Su Mon Kyaw-Myint and Lyndall Strazdins -- A public health approach to environmental and occupational health problems in developing countries / Hülya Gül and Zahide Ceren Atli - Tales of occupational cancer / Devra Davis and Colin D. Butler -- Part 3: Environmental and social epidemiology -- Reprint D: Port Pirie cohort study: environmental exposure to lead and children's abilities at the age of four years / Anthony J. McMichael, P.A. Baghurst, N. Wigg, G. Vimpani, E. Robertson and R. Roberts -- Environmental lead exposure and childhood development / Shilu Tong -- Shining light on human immunity / Robyn Lucas, Ashwin Swaminathan and Keith Dear -- Studying the Thai health-risk transition / Adrian Sleigh and Sam-ang Seubsman -- Climate change and environmental influences on Australia's population distribution / Graeme Hugo and Janet Wall -- Globalisation and the epigenetic landscape / Paolo Vineis -- Uses and misuses of epidemiology / Alistair Woodward -- Part Part 5: Climate change and health -- Reprint G: Global warming, ecological disruption and human health: the penny drops / Anthony J. McMichael -- Fragile paradise / Lachlan McIver and Elizabeth Hanna -- From social reform to social transformation / Hilary Bambrick and Stefano Moncada -- Climate change, health and well-being in indigenous Australia / Donna Green and Leanna Webb -- The sociocultural context of climate change adaption in Australia, with a focus on hot weather / Cathy Banwell, Jane Dixon, Hilary Bambrick, Ferne Edwards and Tord Kjellstrom -- Archived newspaper reports as a complementary source of epidemiological data for research into climate change adaption / Colin L. Siskolne, Justine D. A. Klaver-Kibria, Karen M. McDonald, Donald W. Spady, J. Peter Rothe, Karen Smoyer Tomic, Kaila-Lea Clarke and Gian S. Jhangri -- Health co-benefits of climate change mitigation policies / Andy Haines -- From grass roots to government / Kathryn Bowen -- Part 6: Ecosystem change, infectious diseases and well-being -- Reprint H: Social and environmental risk factors in the emergence of infectious diseases / Robin A. Weiss and Anthony J. McMichael -- Climate change, Ross River virus and biodiversity / Philip Weinstein and Peng Bi -- Detection and attribution of climate change effects on infectious diseases / Melanie Bannister-Tyrell, David Harley and Tony McMichael -- Patterns of ecological change and emerging infectious disease in the Australasian region / Ro McFarlane -- Biodiversity keeps people healthy / Pim Martens and Carijn Beumer -- A case study of urban trees, public health and social equity / Michael Bentley -- Reflections on the virulence of infections / Robin A. Weiss -- Part
