Monografía

This book review series presents current trends in modern biotechnology. The aim is to cover all aspects of this interdisciplinary technology where knowledge, methods and expertise are required from chemistry, biochemistry, microbiology, genetics, chemical engineering and computer science. Volumes are organized topically and provide a comprehensive discussion of developments in the respective field over the past 3-5 years. The series also discusses new discoveries and applications. Special volumes are dedicated to selected topics which focus on new biotechnological products and new processes for their synthesis and purification. In general, special volumes are edited by well-known guest editors. The series editor and publisher will however always be pleased to receive suggestions and supplementary information. Manuscripts are accepted in English

Título: In vitro Environmental Toxicology - Concepts, Application and Assessment edited by Georg Reifferscheid,

Sebastian Buchinger

Editorial: Cham Springer International Publishing Springer 2017

Descripción física: 1 recurso en línea VIII, 324 p.

Mención de serie: Springer eBooks Advances in Biochemical Engineering/Biotechnology 0724-6145 157

Detalles del sistema: Modo de acceso: World Wide Web

ISBN: 9783319459080

Materia: Chemistry Biotechnology Medicinal chemistry Chemistry Biotechnology Medicinal Chemistry Safety in

Chemistry, Dangerous Goods Química

Autores: Reifferscheid, Georg Buchinger, Sebastian
