Structures

Monografía

The book is a collection of contributions by leading experts, developed around traditional themes discussed at the annual Linz Seminars on Fuzzy Set Theory. The different chapters have been written by former PhD students, colleagues, co-authors and friends of Peter Klement, a leading researcher and the organizer of the Linz Seminars on Fuzzy Set Theory. The book also includes advanced findings on topics inspired by Klement(QA(B(3I(Bs research activities, concerning copulas, measures and integrals, as well as aggregation problems. Some of the chapters reflect personal views and controversial aspects of traditional topics, while others deal with deep mathematical theories, such as the algebraic and logical foundations of fuzzy set theory and fuzzy logic. Originally thought as an homage to Peter Klement, the book also represents an advanced reference guide to the mathematical theories related to fuzzy logic and fuzzy set theory with the potential to stimulate important discussions on new research directions in the field

Título: On Logical, Algebraic, and Probabilistic Aspects of Fuzzy Set Theory Recurso electrónico] edited by Susanne Saminger-Platz, Radko Mesiar

Mención de serie: Studies in Fuzziness and Soft Computing 336

Contenido: Fuzzy Logic and the Linz Seminar: Themes and some Personal Reminiscences -- How I Saw and How I See Fuzzy Sets -- Modules in the Category -- A Geometric Approach to MV-algebras -- On the Equational Characterization of Continuous t-norms -- The Semantics of Fuzzy Logics: Two Approaches to Finite Tomonoids -- Structure of Uninorms with Continuous Diagonal Functions -- The Notions of Overlap and Grouping Functions -- Asymmetric Copulas and Their Application in Design of Experiments -- Copul of Processes Related to the Brownian Motion: a Brief Survey -- Extensions of Capacities -- Multi-source Information Fusion Using Measure Representations -- Bases and Transforms of Set Functions -- Conditioning for Boolean Subsets, Indicator Functions, and Fuzzy Subsets -- Multivalued Functions Integration from Additive to Arbitrary Non-Negative Set Function

Restricciones de acceso: Acceso restringido a miembros del Consorcio de Bibliotecas Universitarias de Andalucía

Detalles del sistema: Modo de acceso: world wide web

Fuente de adquisición directa: Springer (e-Books)

ISBN: 9783319288086 9783319288079

Autores: Saminger-Platz, Susanne Mesiar, Radko

Punto acceso adicional serie-Título: Studies in Fuzziness and Soft Computing 336
