Monografía

This book review series presents current trends in modern biotechnology. The aim is to cover all aspects of this interdisciplinary technology where knowledge, methods and expertise are required from chemistry, biochemistry, microbiology, genetics, chemical engineering and computer science. Volumes are organized topically and provide a comprehensive discussion of developments in the respective field over the past 3-5 years. The series also discusses new discoveries and applications. Special volumes are dedicated to selected topics which focus on new biotechnological products and new processes for their synthesis and purification. In general, special volumes are edited by well-known guest editors. The series editor and publisher will however always be pleased to receive suggestions and supplementary information. Manuscripts are accepted in English

Título: Anaerobes in Biotechnology Recurso electrónico-En línea] edited by Rajni Hatti-Kaul, Gashaw Mamo, Bo Mattiasson

Editorial: Cham Springer International Publishing Imprint: Springer 2016

Descripción física: VIII, 472 p. online resource

Tipo Audiovisual: Chemistry Microbiology Biochemistry Chemistry Applied Microbiology Biochemistry, general

Mención de serie: Advances in Biochemical Engineering/Biotechnology 0724-6145 156

Documento fuente: Springer eBooks

Nota general: Chemistry and Materials Science (Springer-11644)

Contenido: Anaerobes in Industrial and Environmental Biotechnology -- Isolation and Cultivation of Anaerobes -- Glycolysis as the Central Core of Fermentation -- Comparative Genomics of Core Metabolism Genes of Cellulolytic and Noncellulolytic Clostridium species -- Enzyme Systems of Anaerobes for Biomass Conversion -- Biotechnology of Anoxygenic Phototrophic Bacteria -- Biological Processes for Hydrogen Production -- Biogas

Production \2013 Microbiology and Technology -- Life in Anoxic Sub-seafloor Environment: Linking Microbial Metabolism and Mega Reserves of Methane Hydrate -- Anaerobes in Bioelectrochemical Systems -- Low Carbon-Fuel and Chemical Production by Anaerobic Gas Fermentation -- Anaerobic Fermentation for Production of Carboxylic Acids as Bulk Chemicals from Renewable Biomass -- Development of Anaerobic High Rate Reactors, Focusing on Sludge Bed Technology -- Anaerobic Probiotics: The Key Microbes for Human Health.-Anaerobes as Sources of Bioactive Compounds and Health Promoting Tools. .

Restricciones de acceso: Accesible sólo para usuarios de la UPV

Tipo recurso electrónico: Recurso a texto completo

Detalles del sistema: Forma de acceso: Web

ISBN: 9783319456515

Autores: Hatti-Kaul, Rajni., editor Mamo, Gashaw., editor Mattiasson, Bo., editor

Entidades: SpringerLink (Servicio en línea)

Enlace a formato físico adicional: Printed edition 9783319456492

Punto acceso adicional serie-Título: Advances in Biochemical Engineering/Biotechnology 0724-6145 156
