Monografía

This book offers a comprehensive introduction by three of the leading experts in the field, collecting fundamental results and open problems in a single volume. Since Leavitt path algebras were first defined in 2005, interest in these algebras has grown substantially, with ring theorists as well as researchers working in graph C^* -algebras, group theory and symbolic dynamics attracted to the topic. Providing a historical perspective on the subject, the authors review existing arguments, establish new results, and outline the major themes and ring-theoretic concepts, such as the ideal structure, \mathbb{Z} -grading and the close link between Leavitt path algebras and graph C^* -algebras. The book also presents key lines of current research, including the Algebraic Kirchberg Phillips Question, various additional classification questions, and connections to noncommutative algebraic geometry. Leavitt Path Algebras will appeal to graduate students and researchers working in the field and related areas, such as C^* -algebras and symbolic dynamics. With its descriptive writing style, this book is highly accessible

Título: Leavitt Path Algebras [Recurso electrónico] by Gene Abrams, Pere Ara, Mercedes Siles Molina

Editorial: London Springer London Imprint: Springer 2017

Descripción física: XIII, 289 p. online resource

Mención de serie: Lecture Notes in Mathematics 0075-8434 2191

Contenido: 1 The basics of Leavitt path algebras: motivations, definitions and examples -- 2 Two-sided ideals -- 3 Idempotents, and finitely generated projective modules -- 4 General ring-theoretic results -- 5 Graph C^* -algebras, and their relationship to Leavitt path algebras -- 6 K -theory -- 7 Generalizations, applications, and current lines of research -- References -- Index

ISBN: 9781447173441

Materia: Mathematics Associative rings Rings (Algebra) K -theory Operator theory Graph theory Mathematics Associative Rings and Algebras K -Theory Operator Theory Graph Theory

Autores: Ara, Pere., author Siles Molina, Mercedes, author

Entidades: SpringerLink Book Series (Online Service)
