Título: Advances in energy research. Volume 24 Morena J. Acosta, editor

Editorial: New York Nova Science Publishers, Inc. 2016

Descripción física: 1 recurso electrónico

Mención de serie: EBSCO Academic eBook Collection Complete Advances in energy research

Contenido: Preface; Chapter 1; Photovoltaic-Green Roofs: Critical Factors, Experimental Studies and Life-Cycle Environmental Profile; Abstract; 1. Introduction; 2. Factors Affecting PV-Green Roof Performance; 2.1. Plant/PV Interaction and PV Output Increase; 2.1.1. Theoretical/Modeling Studies about PV-Green Roofs; 2.1.2. Experimental Studies about PV-Green Roofs; 2.2. The Role of Albedo; 2.2.1 Studies about PV-Green Roofs; 2.2.2. Studies about Simple (without PVs) Green Roofs; 2.3. Advantages of PV-Green Roof during Operational Phase of the Building 2.3.1. Benefits Related to the Soil/Plant Layer 2.3.2. Benefits Related to Plant/PV Interaction; 2.3.3. Additional Benefits; 2.4. Plant Species Suitable for PV-Green Roof Applications; 2.5. Substrate Characteristics and the Role of Plant Species Coexistence; 2.6. Options for the Improvement of PV-Green Roof Cost-Effectiveness; 2.7. Summary of Multiple Issues about PV-Green Roof; 3. Experimental Issues Related to PV-Green Roofs; 3.1. General Information about an Experimental Study for PV-Green Roofs in Spain; 3.2. Electrical Performance; 3.2.1. Experimental Study for the Case of Spain 3.2.2. Experimental Studies for Several Climatic Conditions 3.3. Thermal Performance; 3.3.1. Experimental Study for the Case of Spain; 3.3.2. Experimental Studies for Several Climatic Conditions; 3.4. Analysis in Terms of Incident Irradiance; 3.4.1. Experimental Study for the Case of Spain; 3.4.2. Experimental Studies for Several Climatic Conditions; 4. LCA and Environmental Issues Related to PV-Green Roofs; 4.1. LCIA Methodologies and Environmental Indicators; 4.2. A Study Based on EI99, IMPACT 2002+, CED; 4.3. A Study Based on IPCC 2013 GWP, ReCiPe, Ecological Footprint, USEtox 4.3.1. General Information about the Study 4.3.2. PV-Green Roof: Impact Due to Material Manufacturing; 4.3.3. PV-Green vs. PV-Gravel and PV-Bitumen Roofs; 4.4. LCA Studies about Simple (without PVs) Green Roofs; Conclusion; References; Chapter 2; Benefits of Green Roof Systems: Energy Savings, Stormwater Control, and Economic; Abstract; Introduction; Thermal Benefits; Stormwater Benefits; Economic Benefits; Energy Savings; Theory; Example Experimental Work; Results; Stormwater Benefits; Experimental Work; Results; Economic Savings; References; Biographical Sketch; Biographical Sketch Biographical Sketch Professional Awards; Chapter 3; Technical Management and Automation Systems Applied for Energy Efficiency Improvement in Service Buildings; Abstract; Acronyms and

Variables Used; List of Acronyms; List of Variables; List of Indices of Variables; 1. Introduction; 2. Overview of Building Management Systems; 2.1. Basic Structure; 2.2. Communication; 2.3. Programming; 3. Building Management Systems Applied to Improve Energy Efficiency in Service Buildings; 3.1. Systems Used to Efficiently Control Lighting; 3.2. Systems to Control and Monitor Energy Consumption

Detalles del sistema: Forma de acceso: World Wide Web

ISBN: 9781634855440 1634855442 9781634855150
