Hydrodynamics and sedimentation in wave-dominated coastal environments

<https://rebiunoda.pro.baratznet.cloud:28443/OpacDiscovery/public/catalog/detail/b2FpOmNlbGVicmF0aW9uOmVzLmJhcmF0ei5yZW4vMTk3OTgxNzM>

Título: Hydrodynamics and sedimentation in wave-dominated coastal environments electronic resource] edited by B. Greenwood and R.A. Davis, Jr

Editorial: Amsterdam New York Elsevier New York, N.Y. Distributors for the U.S. and Canada, Elsevier Science Pub. Co. 1984

Descripción física: 1 online resource (476 p.)

Mención de serie: Developments in sedimentology 39

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographies

Contenido: Front Cover; Hydrodynamics and Sedimentation in Wave-Dominated Coastal Environments; Copyright Page; Contents; Preface; Chapter 1. Waves, long waves and nearshore morphology; Chapter 2. Spatial and temporal variations in spectra of storm waves across a barred nearshore; Chapter 3. Waves, currents, sediment flux and morphological response in a barred Nearshore System; Chapter 4. Landward migration of inner bars; Chapter 5. Sediment flux and equilibrium slopes in a barred nearshore; Chapter 6. Sediment transport and morphology at the surf zone of Presque Isle, Lake Erie, Pennsylvania Chapter 7. Sedimentology and morphodynamics of a microtidal beach, Pendine Sands, SW Wales Chapter 8. High-frequency sediment-level oscillations in the swash zone; Chapter 9. Wave-formed structures and paleoenvironmental reconstruction; Chapter 10. Boundary roughness and bedforms in the surf zone; Chapter 11. Tidal-cycle changes in oscillation ripples on the inner part of an estuarine sand flat; Chapter 12. Bedforms and depositional sedimentary structures of a barred nearshore system, eastern Long Island, New York; Chapter 13. Beach and nearshore facies: southeast Australia

Chapter 14. Structures in deposits from beach recovery, after erosion by swell waves around the southwestern coast of Aruba (Netherlands Antilles)Chapter 15. What is a wave-dominated coast?; Chapter 16. Shoreface morphodynamics on wave-dominated coasts; Chapter 17. Control of barrier island shape by inlet sediment bypassing: East Frisian Islands, West Germany; Chapter 18. Coarse clastic barrier beaches: A discussion of the distinctive dynamic and morphosedimentary characteristics Chapter 19. Shoreface translation and the Holocene stratigraphic record: Examples from Nova Scotia, the Mississippi Delta and eastern AustraliaChapter 20. Holocene sedimentation of a wave-dominated barrier-island shoreline : Cape Lookout, North Carolina; Chapter 21. Reconstruction of paleo-wave conditions during the Late Pleistocene from marine terrace deposits, Monterey Bay, California; Chapter 22. Reconstruction of ancient sea conditions with an example from the Swiss Molasse

Lengua: English

ISBN: 1-281-77848-6 9786611778484 0-08-086953-X

Materia: Coast changes- Congresses Sedimentation and deposition- Congresses Hydrodynamics- Congresses

Autores: Greenwood, B. (Brian) Davis, Richard A. (Richard Albert) (1937-)

Congresos: International Congress on Sedimentology 11th :. 1982 :. McMaster University)

Título preferido: Marine geology

Enlace a formato físico adicional: 0-444-42400-8

Punto acceso adicional serie-Título: Developments in Sedimentology
