Título: The science of awakening electronic resource] edited by Angelea Clow and Lisa Thorn

Editorial: Amsterdam Boston Elsevier Academic Press 2010

Descripción física: 1 online resource (310 p.)

Variantes del título: International Review of Neurobiology, Volume 93C

Mención de serie: International review of neurobiology 0074-7742 vol. 93

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and index

Contenido: Cover; International Review of Neurobiology; Copyright; Contents; Contributors; Preface; Underlying Brain Mechanisms that RegulateSleep-Wakefulness Cycles; I. Wakefulness-Regulating Systems; II. Sleep-Regulating Neurons in the Preoptic Hypothalamus; III. Homeostatic Regulation of Arousal States and Preoptic SleepRegulatory Systems: Recent Findings; IV. Integration of Sleep-Regulatory Neuronal Activity in the Preoptic Area; V. Descending Modulation of Arousal Systems by Sleep-RegulatoryNeurons in the Preoptic Area; Acknowledgments; References; Changes In EEG Pre and Post Awakening I. IntroductionII. EEG Changes Preceding an Awakening; III. EEG Changes Following an Awakening; IV. Summary; References; What Keeps Us Awake?-the Role of Clocks and Hourglasses, Light, and Melatonin; I. Introduction; II. Circadian and Homeostatic Impetus for Wakefulness; III. Effects of Light on Human Wakefulness; IV. Effects of Melatonin on Human Sleep and Wakefulness; References; Suprachiasmatic Nucleus and Autonomic Nervous SystemInfluences on Awakening From Sleep; I. Introduction; II. SCN Output Rhythms; III. The Cortisol/Corticosterone Awakening Rise; IV. The Dawn Phenomenon V. The Awakening of the Cardiovascular SystemVI. Conclusion; Acknowledgments; References; Preparation for Awakening: Self-Awakening Vs. ForcedAwakening: Preparatory Changes in the Pre-Awakening Period; I. Introduction; II. Definitions; III. Effects of Attempt to Self-Awaken on Sleep; IV. Self-Awakening and Daytime Functions; V. Habit and Ability of Self-Awakening; VI. Factors of Successful Self-Awakening; VII. Schematic Model of Self-Awakening; VIII. Conclusion; References; Circadian and Sleep Episode Duration Influences on Cognitive PerformanceFollowing the Process of Awakening I. IntroductionII. Time-of-Day

and Cognition; III. Time-of-Day Effects and Waking Up; IV. Length of Sleep Episode and SI; V. Different Measures of Cognitive Functioning; References; The Cortisol Awakening Response in Context; I. Introduction; II. History of the Investigation of the CAR; III. Distinct Regulation of the CAR and Relationship with the SCN; IV. The CAR as an Awakening Process; V. CAR and Cognitive Awakening; VI. CAR and Immunological Awakening; VII. CAR and Behavioral Awakening; VIII. Measurement of the CAR; IX. Conclusions; References Causes and Correlates of Frequent Night Awakeningsin Early ChildhoodI. Parenting Practices; II. Family Context; III. Child Characteristics; IV. Summary; References; Pathologies of Awakenings: The Clinical Problem of InsomniaConsidered From Multiple Theory Levels; I. Chronic Insomnia: Syndromes of Pathological Awakenings; II. Background Conceptual Features of Analysis of Realities About Sleep; III. The Spielman three-factor High-Level Model of Insomnia and Mid-Level Therapeutic Theories of Insomnia Therapies; IV. Cautions About Conceptual Transitions to the Theory Levelof Neuronal Processes V. An Aristotelian Method of Review
