Monografía

Presenting a stimulating synthesis of rapidly growing research interests and publications by scholars in the field of applied mycology and biotechnology. The surge of research and development activity in applied mycology and fungal biotechnology relates to the need and utility of fungi in many contexts. These contexts are wide in scope, and include agriculture, animal and plant health, biotransformation of organic or inorganic matter, food safety, composition of nutrients and micronutrients, and human and animal infectious disease. Containing a balanced treatment of principles, b

Título: Agriculture and food production electronic resource]

Editorial: Burlington Elsevier Science 2001

Descripción física: 1 online resource (447 p.)

Variantes del título: Applied Mycology and Biotechnology Agriculture and Food Production

Mención de serie: Applied Mycology and Biotechnology 1

Nota general: Description based upon print version of record

Contenido: Front Cover; APPLIED MYCOLOGY AND BIOTECHNOLOGY: AGRICULTURE AND FOOD PRODUCTION; Copyright Page; Contents; Preface; Editorial Board for Volume 1; Chapter 1. Applied mycology and biotechnology for agriculture and foods; Chapter 2. Filamentous fungi- growth and physiology; Chapter 3. Metabolic regulation in fungi; Chapter 4. Protein secretion by fungi; Chapter 5. Significance of fungal peptide secondary metabolites in the agri-food industry; Chapter 6. Plant antifungal peptides and their use in transgenic food crops; Chapter 7. Clustered metabolic pathway genes in filamentous fungi Chapter 8. Molecular transformation, gene cloning, and gene expression systems for filamentous fungi Chapter 9. *Aspergillus nidulans* as a model organism for the study of the expression of genes encoding enzymes of relevance in the food industry; Chapter 10. Detection of food-borne toxigenic molds using molecular probes; Chapter 11. Strain improvement in filamentous fungi- an overview; Chapter 12. Fungal solid state fermentation- an overview; Chapter 13. Role of fungal enzymes in food processing; Chapter 14. Production of organic acids and metabolites of fungi for food industry Index of Authors Keyword Index

Lengua: English
