

## Experimental micro/nanoscale thermal transport [

Wang, Xinwei (1948-)

Wiley, 2012

Nanostructured materials- Heat-

Monografía

"This book covers the new technologies on micro/nanoscale thermal characterization developed in the Micro/Nanoscale Thermal Science Laboratory led by Dr. Xinwei Wang. Five new non-contact and non-destructive technologies are introduced: optical heating and electrical sensing technique, transient electro-thermal technique, transient photo-electro-thermal technique, pulsed laser-assisted thermal relaxation technique, and steady-state electro-Raman-thermal technique. These techniques feature significantly improved ease of implementation, super signal-to-noise ratio, and have the capacity of measuring the thermal conductivity/diffusivity of various one-dimensional structures from dielectric, semiconductive, to metallic materials"--

**Título:** Experimental micro/nanoscale thermal transport [Recurso electrónico] Xinwei Wang

**Editorial:** Hoboken, New Jersey Wiley 2012

**Descripción física:** xiii, 264 p. ill

**Mención de serie:** Ebook Central

**Bibliografía:** Includes bibliographical references

**Detalles del sistema:** Modo de acceso: World Wide Web

**Fuente de adquisición directa:** Ebook Central

**ISBN:** 9781118007440 9781118310199
