

Automatic Ambiguity Resolution in Natural Language Processing : an Empirical Approach /

Franz, Alexander (1966-)

Springer Berlin Heidelberg, 1996

Electronic books

Monografía

This is an exciting time for Artificial Intelligence, and for Natural Language Processing in particular. Over the last five years or so, a newly revived spirit has gained prominence that promises to revitalize the whole field: the spirit of empiricism. This book introduces a new approach to the important NLP issue of automatic ambiguity resolution, based on statistical models of text. This approach is compared with previous work and proved to yield higher accuracy for natural language analysis. An effective implementation strategy is also described, which is directly useful for natural language analysis. The book is noteworthy for demonstrating a new empirical approach to NLP; it is essential reading for researchers in natural language processing or computational linguistics

Título: Automatic Ambiguity Resolution in Natural Language Processing an Empirical Approach edited by Alexander Franz

Editorial: Berlin, Heidelberg Springer Berlin Heidelberg 1996

Descripción física: 1 online resource (xx, 164 pages)

Mención de serie: Lecture Notes in Computer Science, Lecture Notes in Artificial Intelligence 0302-9743 1171

Bibliografía: Includes bibliographical references and index

Contenido: Previous work on syntactic ambiguity resolution -- Loglinear models for ambiguity resolution -- Modeling new words -- Part-of-speech ambiguity -- Prepositional phrase attachment disambiguation -- Conclusions

Lengua: English

Copyright/Depósito Legal: 990544267 1060821905 1063864149

ISBN: 9783540495932 electronic bk.) 3540495932 electronic bk.) 9783540620044 3540620044 3540495932

Materia: Computer science Artificial intelligence Computer simulation Statistics Artificial intelligence. Computer science. Computer simulation. Statistics. Computer Science. Engineering & Applied Sciences.
