Monografía

Power electronics and variable frequency drives are continuously developing multidisciplinary fields in electrical engineering, and it is practically not possible to write a book covering the entire area by one individual specialist. Especially by taking account the recent fast development in the neighboring fields like control theory, computational intelligence and signal processing, which all strongly influence new solutions in control of power electronics and drives. Therefore, this book is written by individual key specialist working on the area of modern advanced control methods which penetrates current implementation of power converters and drives. Although some of the presented methods are still not adopted by industry, they create new solutions with high further research and application potential. The material of the book is presented in the following three parts: Part I: Advanced Power Electronic Control in Renewable Energy Sources (Chapters 1-4), Part II: Predictive Control of Power Converters and Drives (5-7), Part III: Neurocontrol and Nonlinear Control of Power Converters and Drives (8-11). The book is intended for engineers, researchers, and students in the field of power electronics and drives who are interested in the use of advanced control methods and also for specialists from the control theory area who like to explore new area of applications

Título: Advanced and Intelligent Control in Power Electronics and Drives edited by Teresa Orowska-Kowalska, Frede Blaabjerg, José Rodríguez

Editorial: Cham Springer International Publishing Imprint: Springer 2014

Descripción física: xx, 410 p. il. 24 cm

Mención de serie: Studies in Computational Intelligence 1860-949X 531

Contenido: Part I: Advanced Power Electronic Control in Renewable Energy Sources -- Part II: Predictive Control of Power Converters and Drives -- Part III: Neuro and Nonlinear Control of Power Converters and Drives

ISBN: 978-3-319-03400-3

Materia: Inteligencia artificial Energía eléctrica- Producción Electrónica de potencia

Autores: Blaabjerg, Frede., editor El Gomerito, editor Orowska-Kowalska, Teresa., editor

Punto acceso adicional serie-Título: Engineering Springer-11647. Studies in Computational Intelligence 1860-949X 531
