

2005 Annual Report on Operations Evaluation

World Bank Group,
2006

Electronic resource

Monografía

The 2005 Annual Report on Operation Evaluation examines the use of information by World Bank managers to improve development results and enhance the effectiveness of the Bank at the country level. It suggests that greater attention is needed to measure and manage development results at the country level. This will require strengthening countries' performance measurement capacity. The Bank is making progress in strengthening the results focus of its monitoring and evaluation, but more attention is needed to improve performance measurement and tracking progress
