**Título:** Cellular Peptidases in Immune Functions and Diseases 2 [Recurso electrónico] edited by Jürgen Langner, Siegfried Ansorge

**Editorial:** Boston, MA Springer US 2002

**Descripción física:** 1 online resource (537 p.)

**Mención de serie:** Advances in Experimental Medicine and Biology 0065-2598 477

**Nota general:** "Proceedings of an International Conference on Cellular Peptidases in Immune Functions and Diseases (II), held September 12-14, 1999, in Magdeburg, Germany"--T.p. verso

**Bibliografía:** Includes bibliographical references and index

**Contenido:** Membrane Ectopeptidases with Influence on Immune Functions -- Review: The Role of Membrane Peptidase in Immune Functions -- Structure and Function of Aminopeptidase N -- Modulation of WNT-5A Expression by Actinonin: Linkage of APN to the WNT-Pathway? -- Enzymatic Activity Is Not A Precondition For The Intracellular Calcium Increase Mediated By mAbs Specific For Aminopeptidase N/CD13 -- Transforming Growth Factor-? Increases the Expression of Aminopeptidase N/CD13 mRNA and Protein in Monocytes and Monocytic Cell Lines -- Cell-Cell Contact Between Lymphocytes and Fibroblast-Like Synoviocytes Induces Lymphocytic Expression of Aminopeptidase n/cd13 and Results in Lymphocytic Activation -- Natural Substrates of Dipeptidyl Peptidase IV -- Relating Structure to Function in the Beta-Propeller Domain of Dipeptidyl Peptidase IV -- Development of a Tertiary-Structure Model of the C-Terminal Domain of DPP IV -- Post Proline Cleaving Peptidases Having DP IV Like Enzyme Activity -- A New Type of Fluorogenic Substrates for Determination of Cellular Dipeptidyl Peptidase IV (DP IV/CD26) Activity -- Potent Inhibitors of Dipeptidyl Peptidase iv and Their

Mechanisms of Inhibition -- N-Terminal HIV-1 Tat Nonapeptides as Inhibitors of Dipeptidyl Peptidase IV. Conformational Characterization -- Signal Transduction Events Induced or Affected by Inhibition of the Catalytic Activity of Dipeptidyl Peptidase IV (DP IV, CD26) -- Specific Inhibitors of Dipeptidyl Peptidase IV Suppress mRNA Expression of DP IV/CD26 and Cytokines -- Dipeptidyl Peptidase IV in Inflammatory CNS Disease -- Dipeptidyl Peptidase IV (CD26): Role in T Cell Activation and Autoimmune Disease -- Effects of Nonapeptides Derived From the N-terminal Structure of Human Immunodeficiency Virus-1 (HIV-1) Tat on Suppression of CD26-Dependent T Cell Growth -- DNA Synthesis in Cultured Human Keratinocytes and Hacat Keratinocytes is Reduced by Specific Inhibition of Dipeptidyl Peptidase IV (CD26) Enzymatic Activity -- Attractin: A Cub-Family Protease Involved in T Cell-Monocyte/Macrophage Interactions -- Analogs of Glucose-Dependent Insulinotropic Polypeptide With Increased Dipeptidyl Peptidase IV Resistance -- Dipeptidyl Peptidase IV (DPP IV, CD26) In Patients With Mental Eating Disorders -- The Membrane-Bound Ectopeptidase CPM as a Marker Of Macrophage Maturation in vitro And in vivo -- Matrix Metalloproteinases (MMP-8, -13 and -14) Interact with the Clotting System and Degrade Fibrinogen and Factor XII (Hagemann Factor) -- The Neprilysin Family in Health and Disease -- Cellular Endopeptidases: New Cathepsins; Results from Knock-out-mice; Regulatory Aspects -- Review: Novel Cysteine Proteases of the Papain Family -- Development and Validation of Homology Models of Human Cathepsins K, S, H, and F -- The Function of Propeptide Domains of Cysteine Proteinases -- Human Cathepsins W and F form A New Subgroup of Cathepsins that is Evolutionary Separated from the Cathepsin B- and L-Like Cysteine Proteases -- Cathepsin K Expression in Human Lung -- Expression of Cathepsins B and L in Human Lung Epithelial Cells is Regulated by Cytokines -- Functions of Cathepsin K in Bone Resorption -- Ceramide as an Activator Lipid of Cathepsin D -- Human Cathepsin X -- A Novel Proteolytic Mechanism for Termination of the Ca<sup>2+</sup> Signalling Evoked by Proteinase-Activated Receptor-1 (PAR-1) in Rat Astrocytes -- Natural and Synthetic Inhibitors of The Tumor-Associated Serine Protease Urokinase-Type Plasminogen Activator -- Processing of Interleukin-18 by Human Vascular Smooth Muscle Cells -- Peptidases and Peptidase Inhibitors in Pathogenesis of Diseases -- Review: Peptidases and Peptidase Inhibitors in the Pathogenesis of Diseases -- The Role of Proteolysis in Alzheimer's Disease -- Observing Proteases in Living Cells -- The Role of Cysteine Proteases in Intracellular Pancreatic Serine Protease Activation -- Peptidases in the Asthmatic Airways -- Inactivation of Interleukin-6 by Neutrophil Proteases at Sites of Inflammation -- Antisense Inhibition of Cathepsin B in a Human Osteosarcoma Cell Line -- Protease-Protease Inhibitor Balance in the Gastric Mucosa -- The Role of Bacterial and Host Proteinases in Periodontal Disease -- Multifunctional Role of Proteases in Rheumatic Diseases -- Evidence of Proteolytic Activation of Transforming Growth Factor  $\beta$  in Synovial Fluid -- Matrix Metalloproteinases and TACE Play A Role in The Pathogenesis of Endometriosis -- Influence of Proliferation, Differentiation and Dedifferentiation Factors on the Expression of the Lysosomal Cysteine Proteinase Cathepsin L (CL) in Thyroid Cancer Cell Lines

**Lengua:** English

**ISBN:** 1-280-04290-7 9786610042906 0-306-46826-3

**Autores:** Langner, Jürgen., editor. edt. <http://id.loc.gov/vocabulary/relators/edt> Ansorge, Siegfried., editor. edt. <http://id.loc.gov/vocabulary/relators/edt>

**Congresos:** International Conference on Cellular Peptidases in Immune Functions and Diseases 2nd :. 1999 :. Magdeburg, Germany)

**Enlace a formato físico adicional:** 0-306-46383-0

**Punto acceso adicional serie-Título:** Advances in Experimental Medicine and Biology 0065-2598 477
