Security Science and Technology

Monografía

This book describes the latest molecular insights needed to understand the chemical and biological (CB) agents and their associated biotechnologies. Its primary focus is to present and discuss molecular technologies such as mass spectrometry, chemical and biological sensors, chromatographic and electrophoretic separation, and comparisons of spectroscopic, immunological and molecular analyses of chemicals used for the detection of chemical and biological agents and to prevent terrorism. This NATO-ASI book also contributes to the critical assessment of existing knowledge on new and important detection technologies. It helps to identify directions for future research and to promote closer working relationships between scientists from different professional fields. .

Título: Molecular Technologies for Detection of Chemical and Biological Agents [Recurso electrónico] edited by Joseph H. Banoub, Richard M. Caprioli

Editorial: Dordrecht Springer Netherlands Imprint: Springer 2017

Editorial: Dordrecht Springer Netherlands 2017

Descripción física: IX, 306 p. 166 il., 106 il. col

Mención de serie: NATO Science for Peace and Security Series A: Chemistry and Biology

Contenido: chapter 1: Immunorecognition of Biological Agents (Alessia Ciafarone) -- Chapter 2: Vaccines, Sera and new Viruses (Alessia Ciafarone) -- Chapter

ISBN: 9789402411133 9789402411126 9789402411140 9789402411256

Materia: Analytical biochemistry Proteomics Microbiology Biotechnology Analytical Chemistry. Proteomics. Medical Microbiology. Spectroscopy and Microscopy. Biotechnology. Security Science and Technology.

Autores: Banoub, Joseph H, ed. lit Caprioli, Richard M, ed. lit

Enlace a formato físico adicional: 94-024-1112-7

Punto acceso adicional serie-Título: NATO Science for Peace and Security Series A: Chemistry and Biology
