Título: Cartesian Currents in the Calculus of Variations II [Recurso electrónico] : Variational Integrals by Mariano Giaquinta, Giuseppe Modica, Jirí Soucek

Editorial: Berlin, Heidelberg Springer Berlin Heidelberg Imprint: Springer 1998

Descripción física: XXIV, 700 p. online resource

Tipo Audiovisual: Analysis Geometry Global analysis (Mathematics) Mathematics Theoretical, Mathematical and Computational Physics

Mención de serie: Ergebnisse der Mathematik und ihrer Grenzgebiete / 3. Folge. A Series of Modern Surveys in Mathematics 0071-1136 38

Contenido: Part I: General Measure Theory -- Integer Rectifiable Currents -- Cartesian Maps -- Cartesian Currents in Euclidean Spaces -- Cartesian Currents in Riemannian Manifolds -- Part II: Regular Variational Integrals -- Finite Elasticity and Weak Diffeomorphisms -- The Dirichlet Integral in Sobolev Spaces -- The Dirichlet Energy for Maps into S^2 -- Regular and Non Regular Integrals -- The Non Parametric Area Functional

ISBN: 9783662062180 978-3-662-06218-0

Autores: Modica, Giuseppe., author Soucek, Jirí., author

Entidades: SpringerLink (Online service)
