Monografía

The past twenty-five years have witnessed a growing worldwide drive to restore the quality of our environment and to protect it from the degrading effects of air, noise, solid waste, and water pollution. In Advanced Air and Noise Pollution Control: Handbook of Environmental Engineering, Volume 2, leading pollution control educators and practicing professionals describe how various combinations of different cutting-edge process systems can be arranged to solve air, noise, and thermal pollution problems. Each chapter discusses in detail a variety of process combinations, along with technical and economic evaluations, and presents explanations of the principles behind the designs, as well as numerous variant designs useful to practicing engineers. The emphasis throughout is on developing the necessary engineering solutions from fundamental principles of chemistry, physics, and mathematics. The authors also include extensive references, cost data, design methods, guidance on the installation and operation of various air pollution control process equipment and systems, and Best Available Technologies (BAT) for air, thermal, and noise pollution control. A companion volume, Air Pollution Control Engineering: Handbook of Environmental Engineering, Volume 1 critically surveys the principles and practices involved in basic air pollution control processes. Cutting-edge and highly practical, Advanced Air and Noise Pollution Control: Handbook of Environmental Engineering, Volume 2 offers educators, students, and practicing engineers a strong grounding in the principles of this critical field, as well as effective methods for developing optimal abatement technologies at costs that are fully justified by the degree of abatement achieved

**Título:** Advanced air and noise pollution control edited by Lawrence K. Wang, Norman C. Pereira, Yung-Tse Hung ; consulting editor, Kathleen Hung Li

**Editorial:** Totowa, N.J. Humana Press ©2005

**Descripción física:** 1 online resource (xviii, 526 pages) illustrations

**Mención de serie:** Handbook of environmental engineering v. 2

**Documento fuente:** Springer e-books

**Bibliografía:** Includes bibliographical references and index

**Contenido:** 1. Atmospheric Modeling and Dispersion / Lawrence K. Wang and Chein-Chi Chang -- 2. Desulfurization and Emissions Control / Lawrence K. Wang, Clint Williford, and Wei-Yin Chen -- 3. Carbon Sequestration / Robert L. Kane and Daniel E. Klein -- 4. Control of Nitrogen Oxides During Stationary Combustion / James T. Yeh and Wei-Yin Chen -- 5. Control of Heavy Metals in Emission Streams / L. Yu Lin and Thomas C. Ho -- 6. Ventilation and Air Conditioning / Zucheng Wu and Lawrence K. Wang -- 7. Indoor Air Pollution Control / Nguyen Thi Kim Oanh and Yung-Tse Hung -- 8. Odor Pollution Control / Toshiaki Yamamoto, Masaaki Okubo, Yung-Tse Hung, and Ruihong Zhang -- 9. Radon Pollution Control Ali Gökmen, Inci G. Gökmen, and Yung-Tse Hung -- 10. Cooling of Thermal Discharges / Yung-Tse Hung, James E. Eldridge, Jerry R. Taricska, and Kathleen Hung Li -- 11. Performance and Costs of Air Pollution Control Technologies / Lawrence K. Wang, Jiann-Long Chen and Yung-Tse Hung -- 12. Noise Pollution / James P. Chambers -- 13. Noise Control James P. Chambers and Paul Jensen
