Monografía

This book focuses on recent advances regarding clinical conditions and ailments whose mechanisms remain unclear, limiting our ability to treat them. The respective chapters address a range of multidisciplinary topics related to timely or emergent research areas, such as osteoporosis in postmenopausal women, the optimal surgical procedures for vertebral compression fractures, novel rehabilitative approaches in pelvic muscle training in case of urinary incontinence, and a rational approach to balneotherapy not only for the skin but also other organ systems disorders. Alterations in the endocrine function during strenuous physical activity at high altitude - a multi-stressor environment comprising hypobaric hypoxia, exercise, and nutritional changes - are presented as well. Other articles provide evidence-based insights into the diagnosis, mechanisms, and clinical course of respiratory infections in children such as bronchiolitis, pneumonia, and influenza. Finally, the pros and cons of e-health are discussed; a rapidly growing area based on the use of information and communication technology to streamline the flow of health information and patient-healthcare provider connections. The content is a well-structured blend of research and practical aspects, as well as updates on cutting-edge developments. All these essential topics are presented in a format suitable for medical professionals engaged in day-to-day patient care and therapy, as well as researchers, academics, and physiotherapists

Título: Advancements and innovations in health sciences electronic resource] Mieczyslaw Polorski, editor

Editorial: Cham Springer c2019

Descripción física: 1 online resource

Mención de serie: Advances in experimental medicine and biology v. 1211 Advances in experimental medicine and biology, Clinical and experimental biomedicine

Contenido: The Internet as a Source of Health Information and Services -- Genetic Predisposition for Osteoporosis and Fractures in Postmenopausal Women -- The "Optimum Volume" of Acrylic Cement Filling for Treating Vertebral Compression Fractures: A Morphometric Study of Thoracolumbar Vertebrae -- Integrated Rehabilitation Approach with Manual and Mechanic-Acoustic Vibration Therapies for Urinary Incontinence -- Sulfurous Balneotherapy in Poland: A Vignette on History and Contemporary Use -- Body Composition and Endocrine Adaptations to High Altitude Trekking in the Himalayas -- Prevalence of Sleep Apnea in Patients with Carotid Artery Stenosis -- Excessive Body Weight and Immunological Response in Children with Allergic Diseases --

Activity of Lysosomal Enzymes during Protein Malnutrition and Progesterone Supplementation in the Mouse --
Infections Caused by Influenza Viruses among Children in Poland during the 2017/18 Epidemic Season -- The
Influence of National Guidelines on the Management of Community-Acquired Pneumonia in Children. Do
Pediatricians Follow the Recommendations? -- Antibiotic Treatment in Patients with Bronchiolitis
