Monografía

After a decade's development, evolutionary computation (EC) proves to be a powerful tool kit for economic analysis. While the demand for this equipment is increasing, there is no volume exclusively written for economists. This volume for the first time helps economists to get a quick grasp on how EC may support their research. A comprehensive coverage of the subject is given, that includes the following three areas: game theory, agent-based economic modelling and financial engineering. Twenty leading scholars from each of these areas contribute a chapter to the volume. The reader will find himself/herself treading the path of the history of this research area, from the fledgling stage to the burgeoning era. The results on games, labour markets, pollution control, institution and productivity, financial markets, trading systems design and derivative pricing, are new and interesting for different target groups. The book also includes informations on useful web sites, conferences, and computer software

Título: Evolutionary Computation in Economics and Finance [Recurso electrónico] by Shu-Heng Chen

Edición: 1st ed. 2002

Editorial: Heidelberg Physica-Verlag HD Imprint: Physica 2002

Descripción física: XII, 460 p

Mención de serie: Studies in fuzziness and soft computing 100 Studies in Fuzziness and Soft Computing 100

Nota general: Incluye índice

Bibliografía: Bibliogr.: p. [419]-455

ISBN: 9783790817843 9783790825121 9783790814767 9783662003152

Materia: Economía- Programas de ordenador Programación matemática

Autores: Chen, Shu-Heng, ed. lit
