

Forest road operations in the Tropics /

Sessions, John
(Writer on forestry)

Springer,
2007

Electronic books

Monografía

"This book brings together information on road planning, location, design, construction, and maintenance to support environmentally acceptable operations in tropical forests. It highlights the challenges of road operations in the tropics, includes techniques that have been shown to be successful, and discusses newer technologies. It is intended as a reference book for the forest engineer and others interested in the planning and management of tropical forests. Numerical examples are included to provide clarity for interpreting graphs; procedures, and formulas. The book covers the various facets of road management from design objectives through practices to control environmental impacts."--Jacket

Título: Forest road operations in the Tropics John Sessions, editor

Editorial: Berlin London Springer 2007

Descripción física: 1 online resource (xi, 170 pages) illustrations, maps

Tipo Audiovisual: landbouw agriculture milieubeheer environmental management bosbouw forestry bosbedrijfsvoering forest management levenswetenschappen life sciences Biology (General) Biologie (algemeen)

Mención de serie: Tropical forestry

Documento fuente: Springer e-books

Bibliografía: Includes bibliographical references (pages 161-164) and index

Contenido: Forest Roads in the Tropics -- Road Standards -- Economic Basis for Forest Road Construction -- Route Selection -- Road Building Materials -- Forest Road Construction -- Crossing Swamps and Wetspots -- Stream Crossings -- Forest Road Maintenance -- Road Equipment and Machinery -- Environmental Protection -- Concluding Comments
