

Harvesting operations in the Tropics /

Sessions, John
(Writer on forestry)

Springer,
2007

Electronic books

Monografía

"The book brings together information on harvest methods, system productivity, and methods for conducting safe, efficient, and environmentally acceptable operations in tropical forests. It highlights the challenges of harvest operations in the tropics, includes techniques that have been shown to be successful, and discusses newer technologies. The book is a reference for those interested in planning and management of tropical forests. Numerical examples are included to provide clarity for interpreting graphs, procedures, and formulas. The book covers harvest systems from planning for felling to log transport from the forest, and concludes with considerations in selecting the appropriate harvesting technology."--Jacket

Título: Harvesting operations in the Tropics Johns Sessions, editor

Editorial: Berlin London Springer 2007

Descripción física: 1 online resource (xii, 170 pages) illustrations

Tipo Audiovisual: landbouw agriculture milieubeheer environmental management bosbouw forestry bosbedrijfsvoering forest management houttechnologie wood technology levenswetenschappen life sciences Biology (General) Biologie (algemeen)

Mención de serie: Tropical forestry 1614-9785

Documento fuente: Springer e-books

Bibliografía: Includes bibliographical references (pages 161-163) and index

Contenido: Planning -- Organization, Administration, and Labor Productivity -- Felling -- Animal Skidding -- Ground-Based Mechanized Skidding and Forwarding -- Cable and Helicopter Yarding Systems -- Loading -- Transport -- Appropriate Harvesting Technology -- Concluding Comments
