Monografía

Reviews the molecular events initiated by unfolded or misfolded proteins leading to conformational human diseases, with special emphasis on the macromolecular homo- and heteroassociations of the malfolded proteins into characteristic ultrastructures found primarily in Parkinson's and Alzheimer's diseases

Título: Protein folding and misfolding neurodegenerative diseases edited by Judit Ovdi, Ferenc Orosz

Editorial: Dordrecht London Springer 2009

Descripción física: 1 online resource

Mención de serie: Focus on structural biology 7

Bibliografía: Includes bibliographical references and index

Contenido: Structural Disorder and Its Connection with Misfolding Diseases; Intrinsic Disorder in Proteins Associated with Neurodegenerative Diseases; Dynamic Role of Ubiquitination in the Management of Misfolded Proteins Associated with Neurodegenerative Diseases; Protein Misfolding and Axonal Protection in Neurodegenerative Diseases; Endoplasmic Reticulum Stress in Neurodegeneration; Involvement of Alpha-2 Domain in Prion Protein Conformationally-Induced Diseases; Synuclein Structure and Function in Parkinson's Disease

Lengua: English
