Set theory : Centre de recerca matemàtica Barcelona, 2003-2004 /

Bagaria, Joan
Todorcevic, Stevo

Birkhäuser Verlag, 2006

Electronic books

Monografía

Contains survey papers on some of the mainstream areas of set theory and research. This book covers topics such as Omega-logic, applications of set theory to lattice theory and Boolean algebras, real-valued measurable cardinals, complexity of sets and relations in continuum theory, weak subsystems of axiomatic set theory, and more

Título: Set theory Centre de recerca matemàtica Barcelona, 2003-2004 Joan Bagaria, Stevo Todorcevic, editors

Editorial: Basel Boston Birkhäuser Verlag 2006

Descripción física: 1 online resource (vi, 406 pages) illustrations

Tipo Audiovisual: wiskunde mathematics combinatoriek combinatorics algebra Mathematics (General) Wiskunde (algemeen)

Mención de serie: Trends in mathematics

Documento fuente: Springer e-books

Bibliografía: Includes bibliographical references

Contenido: An [Omega]-logic primer J. Bagaria, N. Castells and P. Larson. -- Upper semi-lattice algebras and combinatorics M. Bekkali and D. Zhani. -- Small definably-large cardinals R. Bosch. -- Real-valued measurable cardinals and well-orderings of the reals A.E. Caicedo. -- Complexity of sets and binary relations in continuum theory : a survey A. Marcone. -- Weak systems of Gandy, Jensen and Devlin A.R.D. Mathias. -- Some new directions in infinite-combinatorial topology B. Tsaban. -- The number of near-coherence classes of ultrafilters is either finite or 2[superscript c] T. Banakh and A. Blass. -- Stable axioms of set theory S.-D. Friedman. -- Forcing with finite conditions S.-D. Friedman
