Título: The 2nd International Conference Material Engineering and Application [Recurso electrónico] selected, peer reviewed papers from the 2nd International Conference of Material Engineering and Application (2nd ICMEA, 2017), August 18-20, 2017, Shangai, China edited by Mosbeh Kaloop

Editorial: Zurich, Switzerland Trans Tech Publications, Ltd [2018]

Descripción física: 1 recurso electrónico

Mención de serie: EBSCO Academic eBook Collection Complete Applied mechanics and materials v. 875

Contenido: Intro; The 2nd International Conference Material Engineering and Application; Preface, Committees, Sponsors; Table of Contents; Chapter 1: Materials Engineering and Application, Technologies of Materials Processing; Modelling and Analysis of Piezolaminated Functionally Graded Polymer Composite Structures Reinforced with Graphene Nanoplatelets under Strong Electroelastic Fields; Hybrid Adhesives Filled with Functionalized and Non Functionalized Silica Nanoparticles; Chemical Etching of TiO₂ Nanorods Greatly Improves Current Generation of S. loihica PV-4 on a Carbon Paper Electrode New Developments in Scanning Microelectrochemical Techniques: A Highly Sensitive Route to Evaluate Degradation Reactions and Protection

Methods with Chemical Selectivity Finite Element Simulation of Deep Drawing Processes for Shell Bar RR Impact RH/LH; Finite Element Simulation of Hot Forging Process for KVBM Gear; Influence of Water Vapor on Oxide Scale Morphology of Incoloy800HT at 850°C; Study on Mechanical Alloying of TiB₂ Particulate Reinforced Titanium Matrix Composites Hydrogen Influence on Microstructure, Corrosion Resistance and Mechanical Properties of Low Alloy Steel and Explosively Cladded Steel Used for Hydrogen Storage Salt Caverns Comparative Tribological and Mechanical Property Analysis of Nano-Silica and Nano-Rubber Reinforced Epoxy Composites; Growth and Characteristics of High Quality (200) and (111) Orientations Cubic Structure MgZnO Thin Films by Pulse Laser Deposition (PLD) Method; Chapter 2: Practice of Research and Designing in Mechanical Engineering; Designing of Outriggers for the Needs of the Vehicles Stability Testing Design Study of Trapezoid-Shaped Magnetic Flux Concentrator for Axial Amplification Characteristics Modeling and Calibration of the Orthogonality Deviation between the "X" and "Y" Axes of Coordinate Measuring Machines; Numerical Study of NACA 0012 Aeroacoustics Response for Normal and Icing Conditions; Wind Resource Assessment in Cold Regions -- A Numerical Case Study; A Finite Element Analysis on Metal Ball Effect on Dynamics of a Ball Bearing; Optimal Design Parameters of Cab's Isolation System for Vibratory Roller Using a Multi-Objective Genetic Algorithm Analysis of the Characteristics on Dielectric Barrier Discharges Depending on the Relative Permittivity and Frequency Analysis of Factors Influencing the Characteristics of the Tire and its Model Used in MSC. ADAMS /Car; Optimization of Design Parameters for Materials Consumption for Reinforcing Metal Framework of Industrial Buildings; Aerosol Systems of Supply Ventilation, as Means of Air Quality Improvement of Working Zones; On the Calculation Model of Fine Dispersed Dust Pollution of Kabul's Atmosphere for Ventilation Design Air Flow Straighteners; Application to Reduce the Power Consumption of Exhaust Ventilation Schemes

Detalles del sistema: Forma de acceso: World Wide Web
