Título: Advances in cancer research. Volume 10 [electronic resource] edited by Alexander Haddow ; Sidney Weinhouse

Editorial: New York Academic Press 1967

Descripción física: 1 online resource (401 p.)

Mención de serie: Advances in cancer research v. 10

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and index

Contenido: Front Cover; Advances in Cancer Research, Volume 10; Copyright Page; Contents; Contributors to Volume 10; Contents of Previous Volumes; Chapter 1. Carcinogens. Enzyme Induction. and Gene Action; I. Introduction; II. Polycyclic Hydrocarbons and Enzyme Induction; III. The Effect of Drugs and Insecticides on Liver Microsomal Enzymes; IV. The Nature of the Microsomal Drug-Metabolizing Enzyme Systems; V. Effect of Oncogenic Viruses on Enzyme Induction; VI. Enzyme Induction in Rat Hepatoma VII. Pharmacological and Physiological Significance of Polycyclic Hydrocarbons and Drug-Induced Enzyme Activity VIII. The Mechanism of Polycyclic Hydrocarbon and Drug-Induced Increase in Enzyme Activity; IX. Carcinogenesis and Gene Action; References; Chapter 2. In Vitro Studies on Protein Synthesis by Malignant Cells; I. Introduction; II. Current Concepts of Protein Biosynthesis; III. Protein Synthesis by in Vitro Systems Derived from Tumor Cells; IV. Comparison of Protein Synthesis in Tumor with Microbial and Normal Mammalian Systems; V. Summary and Conclusions; References Chapter 3. The Enzymic Pattern of Neoplastic Tissue I. General Ideas about Neoplasia; II. The Measurement of Enzymes in Tissues and the Prediction of Metabolic Behavior; III. Glycolysis and the Enzymes of Glycolysis; IV. Glycerolphosphate Dehydrogenase levels and Glycolysis; V. The Enzymes of the Pentose Pathway; VI. Enzymes of Gluconeogenesis and Glycogen Formation; VII. Tentative Formulation of the Pattern of Enzymes in Neoplastic Tissues; VIII. Discussion; References; Chapter 4. Carcinogenic Nitroso Compounds; I. Introduction; II. Chemistry; III. Acute Toxic Effects; IV. Neoplastic Changes V. Some Special

Features of Nitroso Compounds as Carcinogens VI. Mutagenic Action; VII. Metabolism of Nitroso Carcinogens; VIII. Biochemical Effects; IX. Reactions with Cell Constituents; X. Possible Mechanisms of Action; XI. Public Health Aspects; References; Chapter 5. The Sulfhydryl Group and Carcinogenesis; I. Introduction; II. The SH Group and Normal Cell Division and Growth; III. The Stimulation of Cell Division by SH Groups; IV. SH-SS Cycles in Cell Division; V. Growth Inhibition and Stimulation by Carcinogenic Substances; VI. The Interaction of Carcinogens with SH Groups VII. The Interaction of SH-Reactive Substances of Unknown Carcinogenic Activity or without Carcinogenic Activity VIII. The SH Group in Carcinogenesis; IX. SH Metabolic Systems Possibly Involved in Carcinogenesis; X. Other SH Systems and Carcinogens; XI. Discussion; References; Chapter 6. The Treatment of Plasma Cell Myeloma; I. Introduction; II. Plasma Cell Neoplasms; III. Antineoplastic Treatment of Plasma Cell Myeloma; IV. Summary; References; Author Index; Subject Index

Lengua: English

ISBN: 1-281-45088-X 9786611450885 0-08-056193-4

Materia: Cáncer- Research Oncology, Experimental

Autores: Haddow, Alexander Weinhouse, Sidney

Enlace a serie principal: Advances in cancer research (CKB)954926956844 (DLC)2011236561 (OCOLC)60625515 2162-5557

Enlace a formato físico adicional: 0-12-006610-6
