Título: Advances in cancer research. Volume 40 [electronic resource] edited by George Klein

Editorial: New York Academic Press 1983

Descripción física: 1 online resource (453 p.)

Mención de serie: Advances in cancer research v. 40

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and index

Contenido: Front Cover; Advances in Cancer Research, Volume 40; Copyright Page; Contents; Contributors to volume 40; Chapter 1. 5-Methylcytosine, Gene Regulation, and Cancer; I. Introduction; II. Basic Concepts; III. Evidence for Gene Regulation by DNA Modification; IV. Cause or Effect: Necessary but Not Sufficient; V. Induction of Gene Expression by 5-Azacytidine; VI. Cancer-A Disease Resulting from Abnormal Differentiation; VII. 5-Methylcytosine Levels in Tumorigenic Cells; VIII. Carcinogens and Enzymatic DNA Methylation; IX. Oncogenes; X. Conclusions; References Chapter 2. Immunobiology of Infection with Human Cytomegalovirus I. Introduction; II. Herpesviruses; III. Cytomegaloviruses, HCMV; IV. HCMV-Host Cell Interactions; V. Epidemiology of the Infection with HCMV; VI. Diagnosis of HCMV Infection; VII. Clinical Significance of HCMV Infections; VIII. Oncogenic Potential of HCMV; IX. Immunopathology; X. Latency/Reactivation; XI. Replication of HCMV in Leukocytes; XII. Effects of HCMV on Leukocytes; XIII. Immunity against Infections with HCMV, General Aspects; XIV. Humoral Immune Responses; XV. Cell-Mediated Immunity XVI. Nonspecific Defense Mechanisms against HCMV Infection XVII. Vaccine and Therapy Problems; XVIII. Conclusions; References; Chapter 3. Genetics of Resistance to Virus-Induced Leukemias; I. Introduction; II. The Initial Link between Viruses and Leukemias; III. Characteristics of the Retrovirus Family; IV. Expression in Inbred Mouse Strains of Antigens Associated with MuLV; V. Genetics of Susceptibility to Viral Infection; VI. Prospects for Control of Human Leukemia; References; Chapter 4. Breast Carcinoma Etiological Factors; I. Introduction; II. Heritage; III. Menses, Marital State, Parity IV. Breast-Feeding V. Contraceptives; VI. Benign Epithelial Diseases of the Breast; VII. Hormonal Factors; VIII. Cancer; IX. Iatrogenic Factors; X. Immunological Factors; XI. Viral

Aspects of Human Breast Cancer; XII. Dietary Factors; XIII. Psychosomatic Factors; XIV. Discussion and Concluding Remarks; References; Chapter 5. Treatment of Acute Leukemia-Advances in Chemotherapy, Immunotherapy, and Bone Marrow Transplantation; I. Introduction; II. The Strategy for Treating Acute Leukemia; III. Classification and Prognostic Factors; IV. Chemotherapy of Acute Leukemia; V. Immunotherapy VI. Bone Marrow TransplantationVII. Supportive Treatment; VIII. Prospects for the Future; References; Chapter 6. The Forty-Year-Old Mutation Theory of Luria and Delbrück and Its Pertinence to Cancer Chemotherapy; I. Introduction; II. The Somatic Mutation Theory (1943); III. The Fluctuation Test of Law Pointing to the Origin of Methotrexate-Resistant Leukemia Cells; IV. Wide Fluctuations in the Degree and Duration of Response of Neoplasms to Chemotherapy in Similarly Staged and Treated Individuals V. Effective but Noncurative Chemotherapy Consistently Increases the Survival Time Variance of Treatment Failures

Lengua: English

ISBN: 1-281-45113-4 9786611451134 0-08-056222-1

Materia: Cáncer- Research Oncology, Experimental

Autores: Klein, George

Enlace a serie principal: Advances in cancer research (CKB)954926956844 (DLC)2011236561 (OCoLC) 60625515 2162-5557

Enlace a formato físico adicional: 0-12-006640-8
