Título: Advances in cancer research. Vol. 57 [electronic resource] edited by George F. Vande Woude, George Klein

Editorial: San Diego Academic Press 1991

Descripción física: 1 online resource (497 p.)

Mención de serie: Advances in cancer research

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and index

Contenido: Front Cover; Advances in Cancer Research, Volume 57; Copyright Page; Contents; Contributors to Volume 57; Chapter 1. myc Family Oncogenes in the Development of Normal and Neoplastic Cells; I. Introduction; II. Structure and Organization of myc Family Genes and Transcripts; III. General Features of myc Family Proteins; IV. myc Family Protein Structure-Function Relationships; V. Additional Members of the myc Family; VI. myc Family Gene Expression in Vivo and in Vitro; VII. Regulation of myc Family Gene Expression; VIII. Oncogenic Activities of myc Family Oncogenes; IX. Future Prospects ReferencesChapter 2. Transcriptional and Transforming Activities of the Adenovirus E1A Proteins; I. Introduction; II. Organization and Products of the E1A Gene; III. Transactivating Activity of E1A Proteins; IV. Transforming Activity of E1A Proteins; V. Perspectives; References; Chapter 3. Mitogenic Action of Lysophosphatidic Acid; I. Introduction; II. Phosphatidic and Lysophosphatidic Acid: Biosynthesis and Cellular Metabolism; III. Lysophosphatidic Acids as Mitogens; IV. Mechanism of Action; V. Other Biological Effects; VI. Possible Biological Function and Future Prospects; References Chapter 4. Expression and Interactions of the Src Family of Tyrosine Protein Kinases in T LymphocytesI. Introduction; II. The Src Family of Tyrosine Protein Kinases; III. Patterns of Expression; IV. Involvement of the Src Family in Signal Transduction during T Cell Activation; V. Involvement of the Src Family in Signal Transduction during T Cell Proliferation; VI. Conclusions; References; Chapter 5. Implicating the bcr/abl Gene in the Pathogenesis of Philadelphia Chromosome-Positive Human Leukemia; I. Introduction and Background II. The Molecular Characterization of the Philadelphia ChromosomeIII. From v-abl to c-abl and Back Again; IV.

abl in Human Malignancy; V. Biological Activity of Bcr/Abl in Vitro; VI . Animal Models of Ph1-Positive Leukemias; References; Chapter 6. Oncoprotein Kinases in Mitosis; I. Introduction; II. Protooncoprotein Tyrosine Kinases (PTKs) in Mitosis; III. c-Mos, a Serine/Threonine Kinase, in M Phase; IV. Phosphatases and M Phase; V. Discussion; References; Chapter 7. Current Status of the BCR Gene and Its Involvement with Human Leukemia; I. Introduction; II. The BCR Gene III. BCR Complexes in Hematopoietic CellsIV . Concluding Remarks and Future Directions; References; Chapter 8. p53 and Human Malignancies; I . Introduction; II. Biological Activity of the p53 Protein in Malignant Transformation; III. Proposed Function; References; Chapter 9. Directed Plasminogen Activation at the Surface of Normal and Malignant Cells; I. Introduction; II. Adhesive Interactions of Cell Surfaces with Extracellular Matrices; III. Proteolytic Modulation of the Extracellular Compartment by the Plasminogen Activation System IV. The Principle of Directed Cell Surface Plasminogen Activation

Lengua: English

ISBN: 1-282-16729-4 9786612167294 0-08-056239-6

Materia: Cáncer- Research

Autores: Vande Woude, George F. Klein, George

Enlace a serie principal: Advances in cancer research (CKB)954926956844 (DLC)2011236561 (OCoLC)60625515 2162-5557

Enlace a formato físico adicional: 0-12-006657-2
