Título: Advances in catalysis and related subjects. Volume 3 [electronic resource] edited by W. G. Frankenburg, E. K. Rideal, and V. I. Komarewsky

Editorial: New York London Academic Press 1951

Descripción física: 1 online resource (373 p.)

Mención de serie: Advances in catalysis and related subjects v. 3

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and indexes

Contenido: Front Cover; Advances in Catalysis and Related Subjects, Volume III; Copyright Page; Contents; Contributors to Volume III; Editors' Preface; Chapter 1. Balandin's Contribution to Heterogeneous Catalysis; I. Introduction; II. The Multiplet Theory; III. Discussion of the Theory; IV. Steric Considerations in Catalysis; References; Chapter 2. Magnetism and the Structure of Catalytically Active Solids; I. Introduction; II. General Principles; III. Experimental Methods; IV. The Susceptibility Isotherm; V. Supported Chromium Oxide; VI. Supported Oxides of Manganese; VII. Supported Nickel Oxide VIII. Supported Iron Oxide IX. Supported Copper Oxide; X. Related Systems; XI. Self-Supported Systems; XII. Ferromagnetism; XIII. Identification of Ferromagnetic Phases; XIV. Reaction Processes; XV. Solution Processes; XVI. Summary; References; Chapter 3.

Catalytic Oxidation of Acetylene in Air for Oxygen Manufacture; I. Introduction; II. Condition of Air and Acetylene; III. Acetylene Removal; IV. Catalyst Compositions; V. Regeneration; VI. Mechanism of the Oxidation Reactions; VII. Mechanism of the Oxidation by Silver Nitrate; References; Chapter 4. The Poisoning of Metallic Catalysts I. Catalysts Susceptible to Poisoning II. Principal Types of Catalyst Poisons; III. The Form of Catalyst Poisoning Curves; IV. Further Factors Influencing Toxicity; V. Beneficial Poisoning; References; Chapter 5. Catalytic Cracking of Pure Hydrocarbons; I. Introduction; II. Catalytic Cracking Reactions; III. Catalytic Cracking of Paraffins; IV. Catalytic Cracking of Olefins; V. Catalytic Cracking of Naphthenes; VI. Catalytic Cracking of Aromatic Hydrocarbons; VII. Structure of Cracking Catalysts; References; Chapter 6. Chemical Characteristics and Structure of Cracking Catalysts I. Introduction II. Measurement of the "Acidity" of Cracking Catalysts; III. Identification of the Acid Centers as the Catalytically Active Sites; IV. Structure of the Acid; V. Mechanism of Hydrocarbon Reactions on a Cracking Catalyst; References; Chapter 7. Reaction Rates and Selectivity in Catalyst Pores; I. Introduction; III. The Physical Picture of the Pore Structure; III. Mechanism of Transport in Catalyst Pores; IV. Physical Factors Determining Reaction Rates on Porous Catalysts. (Definition of Rate Constants, the Fundamental Differential Equation and the Law of Conservation of Mass V. Reaction Rates in Single Pores VI. Reaction Rates on Practical Catalyst Pellets; VII. Reaction Rates on Poisoned Catalysts (Apparent Selective Poisoning); VIII. Effect of Pore Structure on Catalyst Selectivity; Appendix; Glossary of Symbols; References; Chapter 8. Nickel Sulfide Catalysts; I. Introduction; II. The Nickel-Sulfur Equilibrium; III. Physical Adsorption of Gases on Ni₂S₂ Catalysts; IV. Chemisorption of Gases on Ni₂S₂; V. Supports for Stabilizing Nickel Sulfide; VI. Preparation of Nickel Sulfide Catalysts; VII. Useful Life and Regeneration VIII. Reactions Catalyzed by Nickel Sulfide

Lengua: English

ISBN: 1-281-73889-1 9786611738891 0-08-056507-7

Materia: Catalysis Chemistry, Physical and theoretical

Autores: Frankenburg, W. G. (Walter Gustave) (1893-1957.) Rideal, Eric K. (Eric Keightley), Sir (1890-) Komarewsky, V. I. (Vasili Ilyich) (1895-)

Enlace a serie principal: Advances in catalysis (CKB)954926975030 (DLC)2011233057 (OCoLC)61764781

Enlace a formato físico adicional: 0-12-007803-1
