Electronic books

Monografía

In the current volume a variety of subjects is treated by competent authors. These subjects deal with new techniques of surface investigations with the microbalance, with the elucidation of reaction mechanisms by the concept of intermediates, and with specialized studies of the ammonia synthesis, hydrogenations, carbon monoxide oxidation and hydrocarbon syntheses. In addition, Volume V contains an extensive critical review of Russian literature in catalysis

Título: Advances in catalysis and related subjects. Volume V [electronic resource] edited by W.G. Frankenburg, V. I. Komarewsky, E.K. Rideal

Editorial: New York Academic Press 1953

Descripción física: 1 online resource (505 p.)

Mención de serie: Advances in catalysis and related subjects 5

Nota general: Description based upon print version of record

Contenido: Cover; Contents; Contributors to Volume V; Editors's Preface; Obituary of Vladimir Nikolaevich Ipat'eff; Chapter 1. Latest Developments in Ammonia Synthesis; I. Introduction; II. Unreduced State of Catalysts; III. Reduced State of Catalysts; IV. Theory of the Reduction Process; V. Kinetics of the Synthesis and Decomposition of Ammonia; VI. Conversion Efficiency at Different Reaction Conditions; VII. Theory and Practice in Industrial Utilization; References; Chapter 2. Surface Studies with the Vacuum Microbalance : Instrumentation and Low-Temperature Applications; I. Microbalance Applications II. Low-Temperature StudiesReferences; Chapter 3. Surface Studies with the Vacuum Microbalance : High-Temperature Reactions; I.

Introduction; II. Thermochemical and Kinetic Theory Calculations; III. Apparatus and Method; IV. Application to the Study of the Oxidation of Metals; V. Study of the Vapor Pressure of Metals and the Effect of Oxide and Nitride Films; VI. Application to the Study of the Combustion of Solid Fuels; References; Chapter 4. The Heterogeneous Oxidation of Carbon Monoxide; I. Introduction; II. Catalysts; III. Promoted Catalysts in Respirator Protection IV. Adsorption Wave Kinetics V. Conclusions; References; Chapter 5. Contributions of Russian Scientists to Catalysis; I. Introduction; II. Schools of Thought on Catalysis; III. Investigation of Absorption Phenomena; IV. Kinetics of Heterogeneous Catalytic Reactions; V. Modification of Catalysts; VI. Catalytic Conversions; References; Chapter 6. The Elucidation of Reaction Mechanisms by the Method of Intermediates in Quasi-Stationary Concentrations; I. Introduction: The Correspondence between Kinetics and Mechanism.; II. Gibbs' Fundamental Rule of Stoichiometry III. Intermediate Products and Sequences IV. Calculation of Stationary Velocities and Concentrations; V. Integration of the Velocity Expressions and Comparison with Experiments; VI. Conclusive and Historical Remarks; References; Chapter 7. Iron Nitrides as Fischer-Tropsch Catalysts; I. Introduction; II. Interstitial Compounds of Iron; III. Iron Nitrides as Fischer-Tropsch Catalysts; References; Chapter 8. Hydrogenation of Organic Compounds with Synthesis Gas; I. Introduction; II. Homogeneous Character of the Hydrogenation of Unsaturated Compounds with synthesis Gas and a Cobalt Catalysts III. Hydrogenation of Organic Compounds IV. Properties, Structure, and Preparation of Dicobalt Octacarbonyl and Cobalt Hydrocarbonyl; V. Mechanism of the Hydrogenation; References; Chapter 9. The Uses of Raney Nickel; I. Introduction; II. Preparation and Properties; III. Special Reactions; References; Author Index; Subject Index

Lengua: English

ISBN: 1-281-40960-X 9786611409609 0-08-056509-3

Materia: Catalysis Chemistry, Physical and theoretical

Autores: Frankenburg, W. G. Komarewsky, V. I. (Vasili Ilyich) (1895-) Rideal, Eric K. (Eric Keightley), Sir (1890-)

Enlace a serie principal: Advances in catalysis (CKB)954926975030 (DLC)2011233057 (OCoLC)61764781

Enlace a formato físico adicional: 0-12-007805-8
