Título: Advances in catalysis and related subjects. Volume X [electronic resource] edited by D.D. Eley, W.G. Frankenburg, V.I. Komarewsky

Editorial: New York Academic Press 1958

Descripción física: 1 online resource (343 p.)

Mención de serie: Advances in catalysis and related subjects 10

Nota general: Description based upon print version of record

Contenido: Cover; Copyright; Contributors to Volume X; Preface; Walter G. Frankenburg 1893-1957; Vasili Ilyich Komarewsky; Contents; Chapter 1. The Infrared Spectra of Adsorbed Molecules; I. Introduction; II. Chemisorption on Supported-Metal Samples; III. Chemisorption on Acidic Oxides; IV. Spectra of Adsorbed Water and Surface Hydroxyl Groups on Nonacidic Oxides; V. Infrared Spectra of Physically Adsorbed Molecules; VI. The Pressed-Salt Method for Obtaining Spectra of Adsorbed Molecules; VII. Spectra of Molecules Adsorbed on Unsupported Metals; VIII. Conclusion; References Chapter 2. The Influence of Crystal Face in CatalysisI. Introduction; II. Factors to be Considered in Developing a Theory of the Influence of Face; III. The Single-Crystal Method of Studying Surface Reactions; IV. Results; V. Discussion; References; Chapter 3. The Nature of Active Centers and the Kinetics of Catalytic Dehydrogenation; I. Quasi-Homogeneous Surfaces; II. Flow Method Kinetics; III. Experimental Results on Dehydrogenation; IV. Discussion of Results and the Multiplet Theory; V. Summary; References Chapter 4. The Structure of the Active Surface of Cholinesterases and the Mechanism of Their Catalytic Action in Ester HydrolysisI. Introduction; II. Enzyme Sources; III. Methods; IV. Catalytic Effects of Cholinesterases; V. Mechanism of Hydrolysis by Cholinesterases; VI. Structure of the Esteratic Site; VII. The

Anionic Sites in the Active Centers of Cholinesterases; VIII. Concluding Remarks; References; Chapter 5.
Commercial Alkylation of Paraffins and Aromatics; I. Introduction; II. Sources of Feed Stock; III. Basic Factors in
Alkylation; IV. Alkylation Reactions; V. Alkylation Processes V. Some Properties of Other Metal-SiO₂
CatalystsReferences; Author Index; Subject Index

Lengua: English

ISBN: 1-281-44224-0 9786611442248 0-08-056514-X

Materia: Catalysis Chemistry, Physical and theoretical

Autores: Eley, D. D. (1911-) Frankenburg. W. G. Komarewsky, V. I. (Vasili Ilyich) (1895-)

Enlace a serie principal: Advances in catalysis (CKB)954926975030 (DLC)2011233057 (OCoLC)61764781

Enlace a formato fisico adicional: 0-12-007810-4
