Título: Advances in catalysis and related subjects. Volume 21 [electronic resource] edited by D. D. Eley, Herman Pines, Paul B. Weisz

Editorial: New York London Academic Press 1970

Descripción física: 1 online resource (422 p.)

Mención de serie: Advances in catalysis v. 21

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and indexes

Contenido: Front Cover; Advances in Catalysis and Related Subjects, Volume 21; Copyright Page; Contents; Contributors; Preface; Chapter 1. Kinetics of Adsorption and Desorption and the Elovich Equation; I. Deviations from Equation (1) at Small t ; II. Discontinuities in the Elovich Plot; III. Effect of Pressure on the Magnitudes of a and b ; IV. Effect of Temperature on a and b Values; V. Theoretical Interpretations of the Elovich Equation; VI. Models Based on Site Number Variation; VII. Models Based on a Variable Activation Energy; VIII. Nonuniform Surface IX. General Solution for Any Distribution FunctionX. Integration of Equation (II); XI. Evaluation of E_0 ; XII. Physical Concept of Site Heterogeneity; XIII. Uniform Surface-Induced Heterogeneity; XIV. Kinetic Order of Desorption Process; XV. Variation of Site Number and of Activation Energy; XVI. Derivation of Equation for Combined Site and Induced Heterogeneity; XVII. Effect of Distribution of Heats of Adsorption on the Rates of Adsorption and Desorption; XVIII. Variation of Parameter b for Readsorption on a Partially Regenerated Surface XIX. Effect of Variation of Adsorption Heat for Both Site and Induced HeterogeneityXX. Adsorption Rates on Partially Regenerated Surfaces Displaying Both Site and Induced Heterogeneity; XXI. Application to Published Results; XXII. Kinetics of Adsorption from a Binary Gas Mixture; XXIII. General; References; Chapter 2. Carbon

Monoxide Adsorption on the Transition Metals; I. Introduction; II. The Bonding in Carbon Monoxide Adsorption; III. The Carbon Monoxide on Tungsten Adsorption System; IV. Adsorption on Molybdenum and Chromium; V. Adsorption on the Group VIII Transition Metals VI. Carbon Monoxide Adsorption on the Remaining Transition Metals VII. The Group Ib Metals; VIII. Conclusions; References; Chapter 3. Discovery of Surface Phases by Low Energy Electron Diffraction (LEED); I. Introduction; II. LEED as a Diffraction Tool; III. Electron Diffraction at Low Energies; IV. LEED Patterns from Adsorbed Layers; V. Relocation of Substrate Atoms; VI. Adsorption Experiments; VII. Catalysis; References; Chapter 4. Sorption, Diffusion, and Catalytic Reaction in Zeolites; I. Introduction; II. Sorption Equilibrium; III. Rates of Sorption, Diffusion, and Desorption IV. Rates of Catalytic ReactionsReferences; Chapter 5. Adsorbed Atomic Species as Intermediates in Heterogeneous Catalysis; I. Introduction; II. The Thermodynamic Activity of an Atomic Species on the Surface of a Catalyst and Its Determination under Steady-State Conditions of a Catalytic Reaction; III. The Concept of the Rate-Determining Step; IV. The Analysis of Empirical Rate Laws; V. Oxygen Transfer Reactions; VI. Sulfur Transfer Reactions; VII. Nitrogen Transfer Reactions; VIII. Hydrogen Transfer Reactions; IX. The Electrical Charge of Adsorbed Atomic Species; X. Concluding Remarks References

Lengua: English

ISBN: 1-282-28640-4 9786612286407 0-08-056525-5

Materia: Catalysis Chemistry, Physical and theoretical

Autores: Eley, D. D. (1911-) Pines, Herman (1902-1996.) Weisz, Paul B.

Enlace a serie principal: Advances in catalysis (CKB)954926975030 (DLC)2011233057 (OCoLC)61764781

Enlace a formato físico adicional: 0-12-007821-X
