Título: Advances in heat transfer. Volume 15 electronic resource] edited by James P. Hartnett, Thomas F. Irvine, Jr

Editorial: New York London Academic Press 1982

Descripción física: 1 online resource (369 p.)

Mención de serie: Advances in heat transfer v. 15

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and index

Contenido: Front Cover; Advances in Heat Transfer, Volume 15; Copyright Page; Contents; List of Contributors; Preface; Contents of Previous Volumes; Second-Law Analysis in Heat Transfer and Thermal Design; I. Introduction; II. Irreversibility, Entropy Generation, and Lost Available Work (Lost Exergy); III. Local Entropy Generation in Convective Heat Transfer; IV. Entropy Generation Minimization in Heat Exchanger Design; V. Thermal Insulation Systems; VI. Concluding Remarks; Nomenclature; References; Note Added in Proof; Non-Newtonian Fluids in Circular Pipe Flow; I. Introduction II. Rheology for Heat Transfer Analysis III. Fluid Mechanics; IV. Heat Transfer; V. Heat and Mass Transfer Analogy for Viscoelastic Fluids; VI. Concluding Remarks; Nomenclature; References; Thermal Convection in Non-Newtonian Fluids; I. Introduction; II. Governing Equations; III. Laminar Thermal Convection in External Flows of Inelastic Non-Newtonian Fluids; IV. Laminar Thermal Convection in External Flows of Viscoelastic Fluids; V. Laminar Mixed Convection in External Flows of Non-Newtonian Fluids; VI. Turbulent Thermal Convection in External Flows of Non-Newtonian Fluids VII. Thermal Convection in Internal Flows VIII. Thermal Convection in a Horizontal Layer of a Non-Newtonian Fluid; IX. Concluding Remarks; Nomenclature; References; Direct Contact Condensation; I. Introduction; II. Direct Condensation on Free Liquid Interfaces; III. Condensation in Bubble Columns; IV. Condensation in (Other) Contacting Devices; V. Applications; Nomenclature; References; A Unified Theory of Linear Diffusion in

Laminated Media; I. Introduction; II. Historical Background; III. General Description of the Problem; IV. Unified n-Layer Model V. Homogenization of Internal and External Boundary Conditions VI. Existence of Solution; VII. Uniqueness of Solution; VIII. n-Layer Limiting Cases; IX. Specialization to a Two-Layer Slab with Double Contact Resistance; X. Conclusion; References; Author Index; Subject Index

Lengua: English

ISBN: 1-281-72716-4 9786611727161 0-08-057569-2

Materia: Energy transfer Heat- Transmission

Autores: Harnett, J. P. (James P.) Irvine, Thomas F. (Thomas Francis)

Enlace a serie principal: Advances in heat transfer (CKB)954928521848 (DLC)2011233356 (OCOlc)268995602
0065-2717

Enlace a formato físico adicional: 0-12-020015-5
