Título: Advances in microbial physiology. Volume 15 electronic resource] edited by A. H. Rose and D.W. Tempest

Editorial: New York, N.Y. Academic Press 1977

Descripción física: 1 online resource (457 p.)

Mención de serie: Advances in microbial physiology 15

Nota general: Includes index

Contenido: Front Cover; Advances in Microbial Physiology, Volume 15; Copyright Page; Contents; Chapter 1. The Physiology and Metabolic Control of Fungal Growth; I. Introduction; II. Mathematical Modelling of Fungal Growth; III. Growth of Undifferentiated Mycelia; IV. Colony Growth; V. Fungal Growth in Submerged Liquid Culture. Technical Considerations; VI. Kinetics of Fungal Growth in Submerged Liquid Culture; VII. Transport Controlled Features of Growth; VIII. Metabolic Control in Fungi; IX. RNA Synthesis and Function: Rate-Limiting Parameters of Growth; X. Acknowledgements; References Chapter 2. Physiology of Halobacteriaceae I. Introduction; II. Classification of Extreme Halophiles; III. Intracellular and Extracellular Salt Concentrations; IV. Subcellular Structures; V. Halophilic Proteins; VI. Lipids in Halobacteriaceae; VII. Electron-Transport Chain; VIII. Transport Across Membranes; IX. Effects of Light; X. Nucleic Acids and Their Enzymology; XI. Phage-Host Relationships; XII. Ecological Considerations on the Existence of Obligate Extreme Halophilism; XIII. Acknowledgements; References; Chapter 3. Sterols in Fungi: Their Functions in Growth and Reproduction I. Introduction II. Functions of Sterols: Possible Approaches to the Problems; III. Sterols in Model Systems; IV. Subcellular Distribution of Sterols in Fungi, and States of Binding; V. Effects of Sterols on Metabolism and Vegetative Growth; VI. Effects of Sterols on Asexual Reproduction; VII. Sexual Hormones of Achlya; VIII. Effects of Sterols on Sexual Reproduction in Homothallic Species of Pythium and Phytophthora; IX. Reproduction in Heterothallic Species of Pythium and Phytophthora; X. Sterols and Sexual Reproduction in Ascomycetes and Basidiomycetes; XI. Conclusion; XII. Acknowledgements References Chapter 4. Active Transport of Solutes in Bacterial Membrane Vesicles; I. Introduction; II. Membrane Vesicles; III. Active Transport Coupled to Electron

Transfer Systems; IV. Energy Coupling to Active Transport; V. Conclusions; VI. Acknowledgements; References; Chapter 5. Adenine Nucleotide Concentrations and Turnover Rates. Their Correlation with Biological Activity in Bacteria and Yeast; I. Introduction; II. Concentrations and Fluxes of Adenine Nucleotides in vivo III. Concentration of ATP, Total Adenine Nucleotide Concentration, and Energy Charge in Relation to Cellular ActivitiesIV. General Discussion; References; Chapter 6. Physiology of Mating in Three Yeasts; I. Introduction; II. Hansenula wingei; III. Schizosaccharomyces pombe; IV. Saccharomyces cerevisiae; V. Comparative Discussion; VI. Acknowledgements; References; Author Index; Subject Index
