Título: Advances in immunology. Vol. 14 [electronic resource] edited by F.J. Dixon, Henry G. Kunkel

Editorial: New York Academic Press 1971

Descripción física: 1 online resource (399 p.)

Mención de serie: Advances in immunology

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and indexes

Contenido: Front Cover; Advances in Immunology, Volume 14; Copyright Page; Contents; List of Contributors; Preface; Contents of Previous Volumes; Chapter 1. Immunobiology of Mammalian Reproduction; I. Introduction; II. Essentials of Reproductive Biology; III. The Uterus as a Craft Site and as a Route for Immunization; IV. Antigenic Status of Semen and Its Consequences; V. Choriocarcinoma; VI. The Fetus Qua Homograft: Factors That May Contribute to Its Success; VII. Susceptibility of Pretrophoblastic Eggs to Transplantation Immunity VIII. Histoincompatibility as a Determinant of Placental Size and Extent of Trophoblastic Invasion IX. Organ-Specific Antigens of the Placenta; X. Maternal-Fetal Exchange of Cells; XI. Natural Occurrence of Transplantation Disease; XII. Immunological Competence of the Placenta; XIII. Concept of Immunological Inertia of Viviparity; XIV. Histocompatibility Gene Polymorphisms and Maternal-Fetal Interactions; References; Chapter 2. Thyroid Antigens and Autoimmunity; I. Introduction; II. The Thyroid Gland: Structure, Function, and Malfunction; III. Purification and Properties of Thyroid Proteins IV. Thyroid Antigens V. Experimental Autoimmune Disease of the Thyroid: the Thyroid Gland as Source and Target; VI. Human Autoimmune Disease of the Thyroid; VII. Features of the Autoimmune Response; VIII. Chemical and Antigenic Structures of the Thyroglobulin Molecule; IX. Concluding Remarks; References; Chapter 3. Immunological Aspects of Burkitt's Lymphoma; I. Introduction; II. Humoral Antibody Studies; III. Studies on Cell-Mediated Immunity; IV. One or Several EB Viruses?; V. Immunological

Studies on Oncogenic Herpes Viruses in Animals; VI. Implications; References Chapter 4. Genetic Aspects of the Complement System I. Introduction; II. Hereditary Angioneurotic Edema; III. C4 Deficiency in Guinea Pigs; IV. C2 Deficiency in Man; V. Guinea Pigs Deficient in the "Third Component of Complement"; VI. Genetic Structural Polymorphism in C3; VII. C3 Deficiency in Man; VIII. Congenital Hypercatabolism of C3; IX. C5 Deficiency in Mice; X. C5 Dysfunction in Man; XI. C6 Deficiency in Rabbits; XII. Miscellaneous; References; Chapter 5. The Immune System: A Model for Differentiation in Higher Organisms; I. Introduction; II. Immunoglobulin Systems III. Structural, Genetic, and Cellular Patterns IV. A Genetic Mechanism for Differentiation: Two Genes -> One Polypeptide Chain; V. Evolution of Immunoglobulin Variable and Constant Genes; VI. Theories of Antibody Diversity; VII. Concluding Remarks; References; Addendum; Author Index; Subject Index

Lengua: English

ISBN: 1-281-46922-X 9786611469221 0-08-057790-3

Materia: Immunology

Autores: Dixon, Frank J. (Frank James) (1920-2008.) Kunkel, Henry G.

Enlace a serie principal: Advances in immunology (CKB)954926956855 (DLC)2005215189 (OCoLC)60626719 1557-8445

Enlace a formato físico adicional: 0-12-022414-3

Punto acceso adicional serie-Título: Advances in immunology
